General Tips for Assembly:

- **Organize Your Pieces:** Before starting, sort your nanoblock pieces by color and size. This will significantly speed

up the building process.

- **Work on a Flat Surface:** Ensure you have a clean, well-lit, and stable surface to prevent losing small pieces.
- **Refer to the Manual:** The included manual provides visual guides for each step. Double-check your placement before pressing blocks firmly together.
- **Use a Tool (Optional):** Some builders find a pair of tweezers helpful for placing very small blocks or separating incorrectly placed ones.

4. Maintenance and Care

To ensure the longevity and appearance of your nanoblock model, follow these care guidelines:

- **Cleaning:** Gently dust your model with a soft brush or a can of compressed air. For more stubborn dirt, lightly dampen a cloth with water and carefully wipe the blocks. Avoid harsh chemicals.
- **Storage:** Store your assembled model in a stable location away from direct sunlight and extreme temperatures to prevent discoloration or warping of the plastic.
- **Handling:** Handle the model with care, especially delicate parts, to avoid accidental disassembly.

5. Troubleshooting

Encountering issues during or after assembly? Here are some common solutions:

- **Missing Pieces:** While rare, if you find pieces are missing, first double-check your work area and the packaging. If pieces are genuinely missing from an officially licensed product, refer to the "Support and Warranty" section for assistance.
- **Unstable Build:**
  - Ensure all blocks are firmly pressed together. Loose connections can lead to instability.
  - Review the instruction manual to confirm all steps were followed correctly, especially for foundational layers or connecting points.
  - For models with stands, ensure the model is correctly seated on the stand as per instructions.
- **Difficulty Distinguishing Colors:** Some nanoblock manuals may feature similar shades (e.g., grey, light grey, white, clear). Pay close attention to the block count and shape indicated for each step to differentiate.
