

## Armitron 20/4507CHGP

# Armitron Men's Gold-Tone Stainless Steel Watch (Model: 20/4507CHGP) Instruction Manual

Model: 20/4507CHGP

## INTRODUCTION

---

This manual provides instructions for the Armitron Men's Gold-Tone Stainless Steel Watch, Model 20/4507CHGP. This timepiece features a genuine crystal-accented dial, a durable gold-tone stainless steel bracelet, and reliable Japanese quartz movement. It is designed for everyday wear and offers water resistance up to 165 feet (50 meters).

Please read this manual carefully to ensure proper use and maintenance of your watch.

## SETUP

---

### 1. Setting the Time

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown out to the first position.
3. Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the correct time.
4. Once the time is set, push the crown back into its original position to engage the movement and start the watch.

## **2. Bracelet Adjustment**

The watch features an adjustable link bracelet with a fold-over clasp and double push-button safety. To adjust the bracelet size, links may need to be added or removed. It is recommended to have this procedure performed by a qualified jeweler or watch technician to prevent damage to the bracelet or clasp.

mechanism.

## OPERATING YOUR WATCH

Your Armitron watch is a simple, reliable timepiece. Once the time is set, the Japanese quartz movement will maintain accurate timekeeping. No further daily adjustments are typically required unless the time zone changes or the battery needs replacement.

## MAINTENANCE

---

### Cleaning

To maintain the appearance of your watch, wipe the case and bracelet with a soft, dry cloth regularly. For more thorough cleaning, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials, as these can damage the finish or crystal.

### Water Resistance

This watch is water resistant to 165 feet (50 meters). This means it is suitable for short periods of recreational swimming, but not for diving or snorkeling. Avoid operating the crown while the watch is wet or submerged, as this can compromise the water resistance. Exposure to hot water (e.g., showers, hot tubs) should also be avoided, as temperature changes can affect seals.

### Battery Replacement

The watch is powered by a quartz battery. When the watch stops running, the battery will need to be replaced. It is recommended to have the battery replaced by a professional watch repair service to ensure the proper battery type is used and the water resistance seal is maintained.

## TROUBLESHOOTING

---

- **Watch Not Running:** Ensure the crown is fully pushed in. If the watch still does not run, the battery may need replacement.

- **Time Inaccuracy:** If the watch is consistently fast or slow, the battery may be low, or the movement may require servicing.
- **Condensation Under Crystal:** This indicates a breach in the water resistance. Avoid further exposure to water and seek professional service immediately.

For issues not covered here, please contact Armitron customer support or a certified watch repair center.

## SPECIFICATIONS

---

Feature	Detail
Model Number	20/4507CHGP
Movement	Japanese Quartz
Case Material	Stainless Steel
Bracelet Material	Stainless Steel
