Operating Instructions

Your GIANTEX storage cabinet is designed for versatile and convenient storage.

- **Using the Flip-Up Doors:** To open a compartment, gently pull the golden metal handle upwards and slide the semi-transparent PC door into the cabinet's upper track. This design saves space compared to traditional swinging doors. To close, pull the door down until the magnetic latches secure it in place.
- **Storage Capacity:** The cabinet features 5 tiers of storage. The top open shelf is suitable for frequently accessed items or decorative pieces. The four enclosed compartments with flip-up doors provide dust-resistant storage for kitchen appliances, dishes, snacks, or other household items.
- **Mobility:** If equipped with wheels, unlock the brakes on the two front wheels to move the cabinet. Relock the brakes once the cabinet is in its desired position to prevent accidental movement.
- **Top Shelf Guardrails:** The top shelf is equipped with anti-falling guardrails to prevent items from accidentally falling off.

Maintenance

Proper care and maintenance will extend the life of your storage cabinet.

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. For stubborn stains, use a mild soap solution and dry immediately. Avoid abrasive cleaners or harsh chemicals that may damage the finish or PC doors.
- **Regular Checks:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Caster/Foot Pad Inspection:** If using wheels, ensure they roll smoothly and brakes function correctly. If using adjustable feet, ensure they are stable and level.

Troubleshooting

If you encounter any issues with your GIANTEX 5-Tier Kitchen Storage Cabinet, please refer to the following common solutions:

- **Cabinet is Unstable/Wobbly:** Ensure all screws are fully tightened. Verify that the anti-tipping kits are properly installed and anchored to the wall. If using adjustable feet, ensure they are adjusted to level the cabinet on uneven floors.
- **Doors Not Closing Properly:** Check if any items inside are obstructing the door mechanism. Ensure the door tracks are clean and free of debris. Verify that the magnetic latches are aligned and functioning.
- **Wheels Not Rolling Smoothly:** Check for any debris caught in the wheels. Ensure the wheel brakes are disengaged.
