Important Safety Information

Always follow basic safety precautions when using electrical appliances to reduce the risk of burns, electric shock, fire, injury to persons, or exposure to excessive microwave energy.

- Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
- Do not operate the oven if it is damaged. It is particularly important that the oven door closes properly and that there is no damage to the door (e.g., bent), hinges and latches (e.g., broken or loosened), or door seals and sealing surfaces.
- The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

Cleaning the Interior:

- **Daily Cleaning:** Wipe the interior surfaces, including the oven floor, with a soft cloth and mild detergent after each use to prevent food buildup.

- **Control Panel:** Wipe the control panel gently with a damp cloth. Do not spray cleaners directly onto the panel.

Grease Filters:

The microwave is equipped with grease filters to trap grease from the cooktop. These filters should be removed and cleaned regularly (e.g., monthly) to maintain optimal ventilation performance.
