KINZUA ENVIRONMENTAL Odor Eliminator-1

KINZUA ENVIRONMENTAL Urine B-Gone Professional Enzyme Odor Eliminator & Pet Stain Remover Instruction Manual

Model: Odor Eliminator-1

1. INTRODUCTION

The KINZUA ENVIRONMENTAL Urine B-Gone is a professional-strength enzyme-based cleaner designed to eliminate urine and other organic stains and odors. This product is formulated with billions of microbe colonies that work to break down and remove odors at their source, rather than just masking them. It is suitable for use on a variety of surfaces and is designed to be safe for use around pets and children when used as directed.

2. SAFETY INFORMATION

Please read and follow all safety instructions before using this product.

- **Keep Out of Reach of Children and Pets:** Store the product in a secure location inaccessible to children and animals.
- **Avoid Eye Contact:** In case of contact with eyes, flush immediately with plenty of water for at least 15 minutes. If irritation persists, seek medical attention.
- **Do Not Ingest:** If swallowed, do not induce vomiting. Drink a glass of water and contact a poison control center or physician immediately.

- **Skin Contact:** Wash hands thoroughly after handling. If skin irritation occurs, rinse with water.
- **Ventilation:** Use in a well-ventilated area.
- **Surface Compatibility:** Always test on an inconspicuous area before full application to ensure colorfastness and prevent damage.

3. SETUP AND PREPARATION

1. **Shake Well:** Before each use, shake the bottle thoroughly to activate the enzyme formula.
2. **Test Surface:** Apply a small amount of Urine B-Gone to an inconspicuous area of the surface you intend to treat. Wait 5-10 minutes, then blot with a clean white cloth. Check for any discoloration or damage before proceeding with full application.
3. **Remove Excess Waste:** For solid waste, remove as much as possible. For liquid waste, blot thoroughly with a clean cloth or paper towels to absorb excess moisture.

4. OPERATING INSTRUCTIONS

Urine B-Gone is effective on a variety of surfaces. Follow the specific instructions below for optimal results.

VERSATILE APPLICATION

CARPETS

UPHOLSTERY

HARDWOOD

DIAPER PAIL

LITTER BOXES

LAUNDRY

TILE | CONCRETE | TRASH CONTAINERS

4.1. General Stain and Odor Removal (Carpets, Upholstery, Hardwood, Tile, Concrete)

1. **Saturate the Area:** Spray the affected area generously with Urine B-Gone, ensuring the product penetrates deep into the material, reaching the source of the odor and stain. For severe or old stains, ensure the product saturates the area at least as much as the original contaminant.
2. **Allow Dwell Time:** Let the product sit and work for at least 15 minutes. For older, tougher stains or strong odors, allow the product to dwell for 1 to 6 hours, or even overnight. Keeping the area moist during this time can enhance effectiveness; you may cover the area with a damp cloth or plastic wrap.
3. **Blot and Clean:** After the dwell time, blot the treated area with a clean, colorfast cloth or paper towels to absorb the product and loosened stain. For carpets, you may use a carpet cleaning machine on a dry-only setting to extract the liquid.
4. **Repeat if Necessary:** For persistent stains or odors, repeat the application process. Multiple applications may be required for complete removal.

4.2. Laundry Application

- **Pre-Treat:** For soiled laundry, pre-spray the affected areas directly with Urine B-Gone before washing. Allow it

to sit for 15-30 minutes.

- **Wash as Usual:** Proceed with your regular laundry cycle using detergent.

4.3. Drains, Urinals, and Toilets

- **Apply Directly:** Pour a small amount of Urine B-Gone directly into drains, urinals, or toilets to eliminate odors and break down organic matter.
- **Allow to Sit:** For best results, apply before extended periods of non-use (e.g., overnight) to allow the enzymes to work.

4.4. Litter Boxes, Diaper Pails, and Trash Containers

- **Spray Surfaces:** After cleaning, spray the interior surfaces of litter boxes, diaper pails, or trash containers with Urine B-Gone to neutralize residual odors.
- **Allow to Air Dry:** Let the product air dry to continue its odor-eliminating action.

UNLEASH THE POWER OF ENZYMES!

Urine-B-Gone contains an army of over 200 billion enzyme soldiers per gallon that break down pet stains and odors.

-  Eliminates Odors At The Source
-  Highest Enzyme Count

5. MAINTENANCE AND STORAGE

- **Storage:** Store Urine B-Gone in its original container in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Container Integrity:** Ensure the cap is tightly sealed after each use to prevent evaporation and maintain product efficacy.
- **Nozzle Care:** If the spray nozzle becomes clogged, rinse it with warm water.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Odor persists after treatment.	Insufficient saturation or dwell time; odor source not fully reached.	Reapply the product, ensuring thorough saturation of the affected area. Increase dwell time to several hours or overnight, keeping the area moist.
Stain remains visible.	Old or deeply set stain; insufficient product application.	Repeat the application process, allowing for a longer dwell time. For very old or stubborn stains, multiple treatments or professional cleaning may be necessary.
Product scent is too strong.	Limited ventilation.	Ensure adequate ventilation in the area during and after application. Open windows or use fans.

7. SPECIFICATIONS

Brand Name: KINZUA ENVIRONMENTAL

Model Number: Odor Eliminator-1

Item Form: Liquid

Scent: Lavender

Item Volume: 32 Fluid Ounces (946 mL)

Item Weight: 2.09 pounds
