- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Regular Inspection:** Periodically check all bolts and connections to ensure they remain tight. Retighten if

necessary to maintain stability and prevent noise.

- **Weight Distribution:** Ensure weight is evenly distributed across the bed frame to prevent undue stress on any single point.

7. TROUBLESHOOTING

- **Squeaking Noises:** The Novilla bed frame is designed with EVA soft cushion strips to prevent squeaking. If noises occur, check all bolts for tightness and ensure the cushion strips are properly in place between the slats and the frame.
