Yaheetech 5-Tier Heavy Duty Adjustable Metal Shelving Unit Instruction Manual

Model: YT-00139225#

1. INTRODUCTION

This manual provides comprehensive instructions for the assembly, operation, and maintenance of your Yaheetech 5-Tier Heavy Duty Adjustable Metal Shelving Unit. Please read this manual thoroughly before installation and use to ensure proper setup and safe operation.

2. SAFETY INFORMATION

- Always secure the shelf to the wall using the provided anti-tipping over unit.
- Do not overload shelves beyond their weight limit to prevent tipping and ensure safety. Each layer can hold a maximum load of 386 pounds.
- Ensure all components are correctly assembled and securely fastened before loading the unit.
- Keep children and pets away from the shelving unit during assembly and when loaded.
- Use appropriate personal protective equipment, such as gloves, during assembly to prevent injury.

3. PACKAGE CONTENTS

Verify that all components are present before beginning assembly:

- MDF Boards (5 pieces)
- Iron Frame Components (vertical posts, horizontal beams)
- Connecting Pieces
- Cap Ends (for top and bottom of posts)
- Anti-tipping over unit (screws and wall plugs)
- Pair of Gloves

4. ASSEMBLY INSTRUCTIONS

The Yaheetech shelving unit features a boltless design for easy assembly. A rubber mallet (not included) is recommended to ensure components are securely fitted.

1. **Prepare the Base:** Attach the bottom horizontal beams to the vertical posts, ensuring the non-slip scratch-resistant pads are placed at the base of the posts. Use a rubber mallet to gently tap the components into place until they are secure.
2. **Install Lower Shelves:** Insert the MDF boards onto the lower horizontal beams. Ensure they sit flush within the frame.
3. **Connect Upper Posts:** Use the provided connecting pieces to extend the vertical posts to the desired height.
4. **Install Remaining Shelves:** Continue attaching horizontal beams and inserting MDF boards for the remaining shelves. The shelves are adjustable; simply align the notches on the beams with the keyhole slots on the vertical posts at your preferred height and tap into place with a mallet.
5. **Secure Top Caps:** Place the cap ends on the top of the vertical posts to prevent nicks and provide a finished look.
6. **Optional Configuration:** The unit can be assembled as one tall 5-tier unit or separated into two smaller, independent shelving units (e.g., a 3-tier and a 2-tier unit) by utilizing the connecting pieces as top caps for the shorter units.
7. **Wall Anchoring:** For added stability and safety, especially with heavy loads or in areas with potential for tipping, secure the unit to a wall using the provided anti-tipping over kit.

5. OPERATING INSTRUCTIONS

Once assembled, your Yaheetech shelving unit is ready for use. Its adjustable design allows for versatile storage solutions.

- **Loading the Shelves:** Distribute weight evenly across each shelf. Do not exceed the maximum load capacity of 386 pounds per shelf or 1930 pounds total for the entire unit.
- **Adjusting Shelf Height:** To adjust a shelf, unload it completely. Gently tap the horizontal beams upwards with a rubber mallet to disengage them from the keyhole slots. Reposition the beams to the desired height and tap them back into place securely.
- **Placement:** This unit is suitable for various environments including offices, garages, living rooms, kitchens, workshops, warehouses, and balconies.

HEIGHT-ADJUSTABLE SHELVES

Customize the shelf height to accommodate items of various sizes

Image: Diagram illustrating the height-adjustable shelves, showing how to customize shelf positions to accommodate items of various sizes using the keyhole slots.

6. MAINTENANCE

To ensure the longevity and appearance of your shelving unit:

- Wipe with a dry cloth to clean. Avoid abrasive cleaners or harsh chemicals.
- Regularly check all connections to ensure they remain secure. Re-tap with a rubber mallet if any components feel loose.
- Inspect the MDF boards periodically for any signs of damage or moisture.

7. TROUBLESHOOTING

- **Unit feels wobbly:** Ensure all horizontal beams are fully seated into the keyhole slots on the vertical posts. Use a rubber mallet to firmly tap all connections. Verify the unit is placed on a flat, level surface. If necessary, secure the

unit to a wall using the anti-tipping over kit.

- **Difficulty assembling components:** Ensure components are correctly oriented. A rubber mallet is essential for securely tapping the boltless connections into place.
- **Shelves not holding weight:** Confirm that the weight on each shelf does not exceed 386 pounds and the total unit weight does not exceed 1930 pounds. Redistribute items if necessary.

8. SPECIFICATIONS

Feature	Detail
Model Name	5-Tier Adjustable Standing Shelf
Model Number	YT-00139225#
Brand	Yaheetech
Material	Engineered Wood (MDF), Metal
Color	Blue
Product Dimensions	12"D x 35.5"W x 71"H
Number of Shelves	5
Max Load Per Shelf	386 lbs
Total Max Load	1930 lbs
Assembly Required	Yes (Boltless)
Special Features	Adjustable, Heavy Duty, Space Saving

5-TIER BOLTLESS STORAGE SHELF

MAX LOAD: **386 LB**
(PER SHELF)
