### Cleaning the TV Body

### Ventilation

## TROUBLESHOOTING

---

If you encounter issues with your TV, refer to the following common solutions:

<b>Problem</b>	<b>Possible Cause / Solution</b>
TV does not turn on.	Check if the power cord is securely plugged into the TV and the wall outlet. Ensure the wall outlet has power. Try pressing the power button on the TV itself, not just the remote.
No picture or poor picture quality.	Verify the correct input source is selected. Check cable connections (HDMI, RF, etc.). Adjust picture settings (brightness, contrast, sharpness) in the TV menu. For 4K content, ensure your source device and cables support 4K.
No sound or poor sound quality.	Check the volume level and ensure the TV is not muted. Verify audio cable connections if using external speakers. If using internal speakers, check audio settings in the TV menu. Ensure Dolby Audio is enabled if desired.
Remote control not working.	Replace the batteries in the remote control. Ensure there are no obstructions between the remote and the TV's IR sensor.
Cannot connect to Wi-Fi or internet.	Ensure your Wi-Fi router is on and functioning. Re-enter the Wi-Fi password. Try restarting both the TV and the router. Consider using a wired Ethernet connection if Wi-Fi issues persist.
Smart features/apps not working.	Ensure the TV is connected to the internet. Verify that you have successfully activated the TV with a Samsung account. Some streaming services require a separate subscription.
