2. **Cleaning Filters:**

   The vacuum uses a HEPA filter system. Regularly check and clean the filters to maintain suction power. Twist and pull to remove the filter assembly from the dustbin. Tap off loose debris. Two spare HEPA filters are included.

   Periodically check the motorized floor brush for tangled hair or debris. Turn off the vacuum and detach the brush head. Use scissors or a cleaning tool to remove any wrapped hair or fibers from the brush roll. Reattach the brush head securely.
