Familiarize yourself with the device's components:

- **USB Connector:** Used for charging and connecting to a computer.
- **Power Switch (REC/SAVE):** A slide switch to turn the device ON/OFF and initiate recording/saving.
- **Microphone:** Integrated for audio capture.
- **Operation Indicator Light:** A small LED that indicates device status (e.g., recording, charging).
- **Reset Hole:** A small pinhole for resetting the device if needed.

## Charging the Device

Before first use, fully charge the voice recorder. Connect the USB connector of the device to a USB port on your computer or a standard USB wall charger (not included). The operation indicator light will typically show a specific color (e.g., red) during charging and change or turn off when fully charged. A full charge takes approximately 2 hours.

# Smart Battery Detection

The USB voice recorder will automatically save your recordings before battery dies

## OPERATING INSTRUCTIONS

---

### Recording Audio

1. **Start Recording:** Locate the power switch on the side of the device. Slide the switch to the "ON" position. The operation indicator light will flash briefly (e.g., red) and then turn off, indicating that recording has begun.
2. **Voice Activated Recording (VOR):** The device supports voice-activated recording. When enabled, the recorder will automatically start recording when sound is detected and pause when silence occurs, conserving storage space. Refer to the device's internal settings (accessed via computer) for VOR sensitivity adjustments.
3. **Stop and Save Recording:** To stop recording and save the file, slide the power switch back to the "OFF" position. The operation indicator light will flash briefly before turning off, confirming the recording has been saved.

### MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the device. Do not use liquid cleaners or solvents.
- **Storage:** Store the device in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Battery Care:** To prolong battery life, avoid fully discharging the device frequently. Charge it regularly, even if not in constant use.

- **File Management:** Regularly transfer important recordings to your computer and delete unnecessary files from the device to free up storage space. While the device has a large capacity, managing files helps maintain optimal performance.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not recording.	Battery is low or depleted. Switch is not in "ON" position.	Charge the device fully. Ensure the power switch is firmly in the "ON" position.
Computer does not recognize the device.	Loose USB connection. Corrupted device file system.	Ensure the USB connection is secure. Try a different USB port or computer. Use the reset hole to restart the device. If issues persist, consider formatting the device ( <i>Note: This will erase all data. Back up files first.</i> ).
Recorded audio is unclear or distorted.	Microphone obstructed. Recording environment too noisy. Device too far from sound source.	Ensure the microphone is clear. Record in a quieter environment. Place the recorder closer to the sound source.
Device not saving recordings.	Storage full. Battery critically low.	Transfer files to computer and delete from device. Charge the device.
