Jimmy BX7 Pro Max Graphene Mattress Vacuum Cleaner Instruction Manual

Model: BX7 Pro Max

1. Introduction

This manual provides comprehensive instructions for the safe and effective use of your Jimmy BX7 Pro Max Graphene Mattress Vacuum Cleaner. This corded handheld vacuum is designed for deep cleaning mattresses, sofas, and other fabric surfaces, featuring advanced technologies such as graphene heating, UV-C sterilization, and a smart dust sensor.

Please read this manual thoroughly before operating the device and retain it for future reference.

2. INCLUDED COMPONENTS

- Jimmy BX7 Pro Max Mattress Vacuum Cleaner Unit
- HEPA Filter (one pre-installed, additional may be included)
- · Power Cord (attached)
- Cleaning Brush with Blade (for maintenance)

3. SETUP

3.1. Unboxing and Initial Inspection

Carefully remove all components from the packaging. Inspect the vacuum cleaner and accessories for any signs of damage. If any damage is found, do not use the device and contact customer support.

3.2. Filter Installation

Ensure the HEPA filter is correctly installed in the dust cup. The filter is typically pre-installed. Refer to the 'Maintenance' section for instructions on how to access and reinstall the filter.

3.3. Power Connection

Plug the power cord into a standard electrical outlet. The device is corded and requires continuous power during operation.

4. OPERATING INSTRUCTIONS

4.1. Powering On/Off

Press and hold the power button for 2 seconds to start the vacuum cleaner. Press the power button again to turn it off.

4.2. Cleaning Modes and Features

- **Graphene Heating Technology:** The vacuum heats up to 149°F (65°C) in approximately 5 seconds. This heat penetrates deep into the fabric to aid in dust removal and dehumidification.
- **UV-C Sterilization:** The integrated UV lamp emits 254nm UV light for deep sterilization of surfaces. The UV lamp activates automatically when the vacuum is in contact with a surface and turns off when lifted.
- **High-Frequency Tapping:** The device utilizes high-frequency tapping to dislodge dust and debris embedded deep within fabrics, enhancing cleaning effectiveness.
- Smart Dust Sensor: A built-in intelligent dust sensor identifies dust levels on fabrics and displays the cleaning status via an LED indicator. A red light indicates a dirty area, while a blue light indicates a clean area.

5.2. Cleaning the Brush Roll

Periodically check the brush roll for entangled hair or debris. Use the provided cleaning brush with a blade to cut and remove any wrapped hair. The brush roll is easily accessible for cleaning.

6. TROUBLESHOOTING

If you encounter any issues with your Jimmy BX7 Pro Max, refer to the following common problems and solutions:

6.1. Brush Roller Not Working

If the brush roller is not functioning, ensure it is free from obstructions like tangled hair or fabric. Check if it is correctly installed. Refer to the video below for detailed instructions.

Video 2: Anti-mite Vacuum Trouble Shooting Brush roller not working. This video provides guidance on troubleshooting a non-functional brush roller.

6.2. Power Cord Loose

If the power cord feels loose or is not providing consistent power, ensure it is securely plugged into both the device and the wall outlet. Avoid pulling the cord forcefully. Refer to the video below for detailed instructions.

Video 3: JIMMY Anti-mite Vacuum Trouble Shooting Power cord loose. This video demonstrates how to address issues with a loose power cord connection.

6.3. Weak Suction, Abnormal Noise, Overheating, or Auto Shut-off

These issues can often be resolved by checking the dust cup and filter for clogs, ensuring the brush roll is clear, and verifying proper assembly. If the device overheats, allow it to cool down before resuming use. Refer to the video below for detailed instructions.
