TAKARA TOMY RMZ-002 Geno SAURER

TAKARA TOMY T-Spark Realize Model ZOIDS RMZ-002 Geno SAURER Model Kit Instruction Manual

Model: RMZ-002 Geno SAURER

Brand: TAKARA TOMY

Introduction

This manual provides detailed instructions for the assembly, operation, and maintenance of your TAKARA TOMY T-Spark Realize Model ZOIDS RMZ-002 Geno SAURER Model Kit. This action plastic kit offers enhanced articulation and faithful reproduction of the iconic Zoid, allowing for dynamic posing and recreation of memorable scenes.

Setup and Assembly

The Geno SAURER model kit is designed for ease of assembly, offering a rewarding building experience. Follow the included printed instructions carefully for step-by-step guidance. Ensure all parts are accounted for before beginning assembly.

- **Unpacking:** Carefully remove all components from the packaging.
- **Part Identification:** Refer to the parts list in the separate assembly guide to identify each component.
- **Tools:** Basic model building tools such as nippers for cutting parts from runners, a hobby knife for trimming, and tweezers for small parts may be helpful.
- **Assembly Sequence:** Follow the numerical order provided in the assembly manual. Do not force parts together; if a part does not fit, recheck the instructions and part orientation.

Operating and Articulation

The Geno SAURER features advanced articulation and various gimmicks to allow for a wide range of dynamic poses, enhancing its realistic dinosaur movements and anime scene reproduction.

1. Neck and Body Motion

The torso and neck incorporate retractable joints, enabling natural movements such as turning the upper body and looking around. This allows for expressive poses like looking up, turning, and roaring.

Image: The Geno SAURER model showcasing its extensive neck and body articulation, allowing for dynamic and expressive poses.

2. Arm Motion

The base of the shoulders can be pulled out, allowing the arms to be posed inward. This enables natural poses such as a biting stance or a defensive posture.

Image: The Geno SAURER model illustrating the range of motion in its arms, including the ability to pull out shoulder bases for inward posing.

3. Leg Motion

The legs can achieve both "V-shape" and "inverted V-shape" poses. It can also pose with its feet directly under its body, mimicking a bipedal dinosaur's walking or running stance. The leg vernier cover is newly designed and can be opened or closed. The claw parts on the legs can move independently.

Image: The Geno SAURER model displaying its leg articulation, allowing for various stances including a bipedal dinosaur's natural walking pose.

4. Tail Motion

The base of the tail slides, and its joints are divided into smaller sections, expanding the range of motion in all directions. This allows for natural poses from the neck to the tip of the tail. The impressive tail section opens when firing the charged particle cannon.

Image: The Geno SAURER model illustrating the flexible and wide range of motion in its tail, allowing for dynamic posing.

5. Detailed Movable Gimmicks

- The claw parts on the arms can move independently.
- The newly designed leg vernier cover can be opened or closed.
- The long-range pulse laser rifle can rotate left and right, and its elevation angle can be adjusted up and down.

Image: Close-up views of the Geno SAURER highlighting individual movable gimmicks such as independent arm claws, opening leg vernier covers, and adjustable long-range pulse laser rifle.

6. Interchangeable Head Parts

By replacing the head weapon, it is possible to switch between mass-produced and special machine configurations. This allows for customization and varied display options.

Image: The Geno SAURER model demonstrating the ability to switch between mass-produced and dedicated machine types by interchanging head weapon parts.

7. Pilot Figures and Cockpit

The cockpit hatch features an opening and closing gimmick. The kit includes 1/100 scale pilot figures (Ban & Fine, and a regular soldier) that can be placed inside the cockpit.

8. Anime Scene Reproducibility

The model features movable gimmicks to enhance the expression of memorable scenes from the TV anime, such as the "charged particle cannon firing form" and "hovering form."

- **Charged Particle Cannon:** The anchor is movable, and the cooling unit opens and closes, allowing recreation of the firing sequence. Effect parts are included to reproduce the state of firing immediately after charging.
- **Hovering Mode:** It is possible to pose the model in the hovering motion mode as seen in the anime.
- **Long-Range Pulse Laser Rifle:** Effect parts are included to recreate the firing state of the long-range pulse laser rifle.

Maintenance

Proper maintenance ensures the longevity and appearance of your model kit.

- **Cleaning:** Use a soft, dry cloth or a soft brush to gently remove dust. Avoid abrasive cleaners or solvents, as they may damage the plastic.
- **Storage:** Store the model in a cool, dry place away from direct sunlight and extreme temperatures to prevent discoloration or warping of plastic parts.
- **Handling:** Handle the model by its sturdy parts. Avoid applying excessive force to delicate joints or small components.

Troubleshooting

If you encounter any issues during assembly or operation, refer to these common solutions:

- **Parts Not Fitting:** Double-check the assembly instructions and ensure you are using the correct parts and orientation. Some parts may require gentle pressure, but never force them. Trim any excess plastic (nubs) from the parts.
- **Loose Joints:** If a joint feels too loose, a small amount of clear hobby cement or a thin layer of clear nail polish applied to the peg and allowed to dry can increase friction.
- **Broken Parts:** For minor breaks, plastic cement designed for model kits can be used. For significant damage, contact the manufacturer for potential replacement parts if available.
- **Missing Parts:** Carefully re-check the packaging and runners. If a part is genuinely missing, contact the retailer or manufacturer with proof of purchase.

Specifications

Attribute	Detail
Brand Name	TAKARA TOMY
Model Name	GN031
Model Number	TSK9696
Manufacturer Part Number	RMZ-002
Character	Genosaurer (Zoids)
Toy Figure Type	Action Figure
Scale	1/100
Item Dimensions (L x W x H)	4.33" x 11.42" x 5.91" (11cm x 29cm x 15cm)
Item Weight	0.68 Kilograms
Number of Pieces	1 (refers to the complete model, not individual kit parts)
Material Type	Plastic
Age Range Description	Kid (Manufacturer Minimum Age: 180 months / 15 years)
Assembly Required	Yes (Implied by "Model Kit" despite specification saying "No")
Batteries Required	No

Note: The "Number of Pieces" refers to the final assembled model. The kit contains multiple individual parts for assembly. The "Assembly Required" specification in the source data may be a general product listing detail; as a "Model Kit," assembly is inherent.
