2. SETUP

2.1 Battery Installation

The keyboard requires two AAA batteries (not included) for operation. Follow these steps to install the batteries:

1. Locate the battery compartment on the back of the keyboard.
2. Open the battery compartment cover.
3. Insert two AAA batteries, ensuring correct polarity (+/-).
4. Close the battery compartment cover securely.

2.2 Bluetooth Connection Steps

To connect your OMOTON Bluetooth Keyboard to your Mac device, follow these instructions:

1. Insert 2 AAA batteries into the keyboard (as described above).
2. Slide the power switch on the keyboard from OFF to ON.
3. Double-click the "CONNECT" button located on the back of the keyboard.
4. On your Mac, turn on Bluetooth.
5. In the Bluetooth settings, "KB066 Mac Keyboard" should appear. Select it to begin pairing.

3.4 Power Saving Mode

To conserve battery life, the keyboard features an environmentally friendly auto-sleep mode. After 10 minutes of inactivity, the keyboard will enter sleep mode. To wake it up, simply click any key.

4. MAINTENANCE

4.1 Cleaning

To maintain the keyboard's appearance and functionality, regularly clean it with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, ensuring no moisture enters the keycaps or internal components. Avoid using harsh chemicals or abrasive cleaners.

4.2 Battery Replacement

When the keyboard's performance degrades or it fails to connect, it may be time to replace the AAA batteries. Follow the battery installation steps in Section 2.1.

5. TROUBLESHOOTING

If you encounter issues with your OMOTON Bluetooth Keyboard, refer to the following common troubleshooting tips:

- **Keyboard not connecting:**

- Ensure the keyboard is powered on and has fresh batteries.
- Double-check that Bluetooth is enabled on your Mac device.
- Press the "CONNECT" button on the back of the keyboard to re-enter pairing mode.
- Remove the keyboard from your Mac's Bluetooth device list and attempt to pair it again.

- **Keys not responding:**

- Verify that the keyboard is connected via Bluetooth.
- Replace the batteries if they are low.
- If specific keys are not responding, ensure no debris is lodged under the keycap.

- **Input delay after waking from sleep:**

- A slight delay of one or two seconds may occur when the keyboard wakes from auto-sleep mode before inputs are shown on screen. This is normal operation.

- **"Delete" vs. "Backspace" key:**

- The keyboard features a "Delete" key. This key performs both the delete (forward delete) and backspace functions. To delete characters to the left of the cursor, simply press the "Delete" key. To delete characters to the right, highlight them first, then press "Delete".

6. SPECIFICATIONS

Feature	Detail
