LifePro Lifepro Red Light Therapy Device (B0D8LSCCZ2)

Lifepro Red Light Therapy Device Instruction Manual

Model: Lifepro Red Light Therapy Device (B0D8LSCCZ2)
Brand: LifePro

1. Introduction

This manual provides detailed instructions for the safe and effective use of your Lifepro Red Light Therapy Device. Please read all instructions carefully before operating the device and retain this manual for future reference.

2. Product Overview

The Lifepro Red Light Therapy Device is a portable device designed for targeted light therapy. It features multiple wavelengths to support various wellness needs.

Figure 1: The Lifepro Red Light Therapy Device. This image displays the compact and sleek design of the device, highlighting its portability.

3. Package Contents

Verify that all items are present in your package:

- Lifepro Red Light Therapy Device
- Carrying Case
- Wall Charger

- Extra Battery
- Protective Sleeve
- Cleaning Cloth
- User Manual (this document)

Figure 2: Device and accessories neatly organized within the compact carrying case. This image shows the device, wall charger, extra battery, and protective sleeve securely fitted into their designated compartments.

4. Setup

1. **Charge the Battery:** Insert the provided rechargeable battery into the wall charger. Plug the charger into a standard electrical outlet. The indicator light on the charger will show charging status. Ensure the battery is fully charged before first use.
2. **Insert Battery into Device:** Unscrew the bottom cap of the therapy device. Insert a charged battery with the positive (+) end facing the light source. Screw the cap back on securely.
3. **Prepare for Use:** For eye protection, always wear the provided protective glasses when using the device, especially when using the Near-Infrared light.

5. Operating Instructions

The device offers multiple light modes and a pulsed mode for enhanced therapy.

1. **Power On/Off:** Press and hold the power button located on the side of the device for approximately 2 seconds to turn it on or off.
2. **Cycle Through Light Modes:** Short press the power button to cycle through the available light modes:

- **Pink Light:** Visible light, often associated with skin rejuvenation.
- **Red Light:** Visible light (630-660nm), commonly used for skin health and collagen production.
- **Near-Infrared Light (NIR):** Invisible light (850nm), penetrates deeper for muscle and joint support. *(Note: This light is not visible to the naked eye but can be seen in dark conditions. Always use protective glasses.)*
- **Blue Light:** Visible light, often used for acne and skin purification.

3. **Activate 10Hz Pulsed Mode:** After cycling through all continuous light modes, press the power button again to activate the 10Hz pulsed mode. In this mode, the device will cycle through the pink, red, near-infrared, and blue lights, each blinking 10 times per second. This pulsing is designed to enhance the therapeutic effect.
4. **Session Duration:** Each continuous light therapy session automatically runs for 3 minutes before turning off. If you wish to continue, allow the device to cool down briefly before restarting.
5. **Application:** Hold the device approximately 1-3 inches from the skin over the desired area.

Figure 3: User applying the therapy device to the face. This image demonstrates the typical usage of the device for targeted application on skin.

6. Maintenance

- **Cleaning:** Wipe the device with a soft, damp cloth after each use. Do not use abrasive cleaners or immerse the device in water.
- **Battery Care:** Store batteries in a cool, dry place. If the device will not be used for an extended period, remove the battery.
- **Storage:** Store the device in its original carrying case in a cool, dry place, away from direct sunlight and extreme temperatures.

7. Troubleshooting

Problem	Possible Cause	Solution
Device does not turn on.	Battery is not charged or incorrectly inserted.	Ensure battery is fully charged and inserted with correct polarity. Try the extra battery.
Light output seems weak.	Low battery charge.	Recharge the battery.
Device turns off unexpectedly.	Session duration completed (3 minutes).	This is normal operation. Allow device to cool down before restarting if desired.

If you encounter issues not listed here, please contact Lifepro customer support for assistance.
