Scosche MEQMRAMPS-UB

Scosche Qi2 Wireless MagSafe Car Mount Charger User Manual

Model: MEQMRAMPS-UB

Brand: Scosche

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Scosche Qi2 Wireless MagSafe Car Mount Charger (Model MEQMRAMPS-UB). This device is designed to securely hold and wirelessly charge compatible smartphones in your vehicle, utilizing Qi2 technology and MagSafe compatibility for efficient power delivery up to 15W. Please read this manual thoroughly before use to ensure proper functionality and safety.

PACKAGE CONTENTS

Verify that all items listed below are present in your package:

- Qi2 Wireless Charging Phone Mount Head (MagSafe Compatible)
- AMPS Adapter Base with 4 Mounting Screws
- Dual USB-C Port 40W Car Charger
- 2 Cable Management Clips

SETUP INSTRUCTIONS

1. **Prepare the AMPS Mounting Plate:** This charger requires an existing ProClip vehicle-specific mount base with an AMPS mounting plate (not included). Ensure your vehicle has a compatible AMPS mounting plate securely installed.

3. **Connect Power:** Insert the included 40W USB-C car charger into your vehicle's 12V power outlet. Connect the USB-C cable from the wireless charging mount head to one of the USB-C ports on the car charger.
4. **Cable Management:** Utilize the integrated cable management system on the back of the mount head to wrap any excess USB-C cable. Use the provided cable management clips to neatly route the cable, ensuring a clutter-free dashboard.

INTEGRATED CABLE MANAGEMENT

Wrap up any unused cable for a clean dash

OPERATING INSTRUCTIONS

Phone Compatibility

This charger is compatible with iPhone models featuring MagSafe technology (iPhone 12 series and newer, excluding iPhone 12 Mini which charges at 12W) and Qi2-ready phones with magnetic cases. For optimal magnetic hold and

charging efficiency, ensure your phone or phone case is MagSafe or Qi2 compatible.

2. **Confirm Charging:** Once attached, your phone should begin wireless charging. The charger delivers up to 15W of power. A charging indicator on your phone screen will confirm the connection.

Removing Your Phone

To remove your phone, simply pull it away from the magnetic charging surface. The magnetic mount head allows for easy placement and removal.

MAINTENANCE

- Keep the charging surface clean and free of dust or debris to ensure optimal charging performance.
- Wipe the device with a soft, dry cloth. Do not use abrasive cleaners or solvents.

- Regularly check the mounting screws for tightness to ensure the mount remains secure.

TROUBLESHOOTING

Phone does not charge wirelessly:

- Ensure the USB-C cable is securely connected to both the mount head and the car charger, and the car charger is properly inserted into the vehicle's 12V outlet.
- Verify your phone or phone case is MagSafe or Qi2 compatible. Non-magnetic or thick cases may interfere with charging.
- Reposition your phone on the charging surface to ensure proper alignment with the charging coils.
- Check if your phone's wireless charging feature is enabled.

Phone does not stay securely attached:

- Confirm your phone or phone case is MagSafe or Qi2 compatible with strong integrated magnets.
- Ensure the phone is properly aligned with the magnetic surface of the mount.
- Thick or non-magnetic cases can weaken the magnetic hold. Consider using a MagSafe-compatible case.
- Verify the AMPS mounting plate and the mount head are securely fastened to your vehicle.

Mount or phone becomes excessively hot during charging:

- Wireless charging generates some heat; this is normal. However, excessive heat may indicate an issue.
- Ensure proper phone alignment. Misalignment can cause inefficiency and heat.
- Avoid charging in direct sunlight or in a vehicle with extremely high interior temperatures.
- If overheating persists, discontinue use and contact customer support.

SPECIFICATIONS
