ZOVII ZCL08

ZOVII Solid Alarm Chain Lock ZCL8-120 User Manual

Comprehensive instructions for setup, operation, and maintenance.

1. INTRODUCTION

Thank you for choosing the ZOVII Solid Alarm Chain Lock Series ZCL8-120. This robust and durable security solution is designed to provide superior protection for your motorcycles and bicycles. Featuring an alloy steel electronic lock body, an 8mm carbide-reinforced steel chain, and a powerful 120dB anti-theft alarm, this lock offers an impenetrable defense against various forceful attempts. This manual will guide you through the proper setup, operation, and maintenance of your new chain lock.

2. SAFETY INFORMATION

- Always ensure the lock is properly engaged and secured before leaving your vehicle unattended.
- Keep keys in a safe place and away from the lock. Do not store spare keys on the vehicle.
- The alarm is loud (120dB). Avoid prolonged exposure to the alarm sound to prevent hearing damage.
- Do not attempt to disassemble the electronic components beyond battery replacement, as this may void the warranty and cause damage.
- Dispose of used batteries responsibly according to local regulations.
- Keep out of reach of children.

3. PACKAGE CONTENTS

Upon opening the package, please verify that all components are present:

- 1 x ZOVII Solid Alarm Chain Lock (ZCL8-120)

- 3 x Keys
- 1 x Allen Key
- 1 x Nylon Sleeve Bag
- 1 x CR2 Battery (included)

4. SETUP AND BATTERY INSTALLATION

Your ZOVII Alarm Chain Lock comes with a CR2 battery pre-installed. However, if you need to replace the battery or ensure it's correctly seated, follow these steps:

1. Unlock the chain lock using one of the provided keys.
2. Locate the small hex screw inside the lock head. Use the provided Allen key to loosen this screw.
3. Carefully take out the battery compartment.
4. Open the waterproof lid of the battery compartment.
5. Install the CR2 lithium battery, ensuring correct polarity.
6. Reassemble the parts: close the waterproof lid, insert the battery compartment back into the lock head, and tighten the hex screw with the Allen key.
7. Once the battery is installed, the lock will emit a short beep, indicating it's ready for use.

5. OPERATING INSTRUCTIONS

5.1. Locking the Chain Lock

To secure your motorcycle or bicycle:

1. Wrap the 1200mm steel chain around your vehicle's frame and a secure, immovable object (e.g., a bike rack, lamppost).
2. Insert the end of the chain into the lock body. Ensure it clicks firmly into place.
3. The lock will emit a single beep, indicating it is locked and the alarm is armed.

5.2. Alarm Functionality

The built-in 120dB anti-theft security alarm is designed to deter theft. Once armed, any significant vibration or attempt to tamper with the lock will trigger the alarm. The alarm will sound for approximately 10-15 seconds and then re-arm itself if the disturbance ceases. Repeated tampering will cause the alarm to sound continuously.

120dB ALARM

Built-in 120dB anti-theft security alarm is extremely loud. When activated, the high-frequency sound can transmit up to 300 meters, making any illegal attempt to cut through the lock futile.

5.3. Unlocking the Chain Lock

To unlock the chain lock and disarm the alarm:

1. Insert the key into the keyhole on the lock body.
2. Turn the key to unlock. This action will disarm the alarm and allow you to remove the chain.

6. MAINTENANCE

- **Battery Replacement:** Replace the CR2 battery when the alarm sound becomes weak or the lock fails to arm. Refer to Section 4 for detailed battery replacement instructions.
- **Cleaning:** The lock body and chain can be wiped clean with a damp cloth. The nylon cover protects your bike's paintwork and can also be cleaned as needed.
- **Corrosion Resistance:** The lock incorporates specialized materials and coatings for exceptional corrosion resistance. While it is IP67 rated for water and dust ingress, it is recommended to wipe it dry after exposure to heavy

rain or moisture to prolong its lifespan.

- **Keyhole Maintenance:** Periodically apply a small amount of graphite lubricant to the keyhole to ensure smooth operation. Avoid using oil-based lubricants.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Alarm is weak or not sounding.	Low battery.	Replace the CR2 battery (refer to Section 4).
Alarm triggers too easily or falsely.	Excessive vibration or sensitivity.	Ensure the lock is not placed in an area prone to constant vibrations. The lock has a built-in sensitivity, which is not adjustable.
Lock mechanism is stiff or difficult to operate.	Dirt or debris in keyhole; lack of lubrication.	Clean the keyhole and apply graphite lubricant.

Problem	Possible Cause	Solution
Lock does not arm after closing.	Battery issue; lock not fully engaged.	Check battery installation. Ensure the chain end is fully inserted until it clicks.

8. SPECIFICATIONS

- **Model:** ZCL8-120 (Item model number: ZCL08)
- **Chain Material:** 8mm Carbide-reinforced steel
- **Lock Body Material:** Alloy Steel
- **Chain Length:** 1200mm (120 cm)
- **Alarm Volume:** 120dB
- **Waterproof Rating:** IP67
- **Battery Type:** 1 x CR2 Lithium Battery (included)
- **Product Dimensions:** 119.99 x 2.54 x 2.54 cm (approx. 120 x 2.5 x 2.5 Centimetres)
- **Item Weight:** 1.62 kg
- **Special Features:** Anti-Drill, Anti-Corrosion, Alarm, Cut Resistant
- **Recommended Uses:** Motorcycles and bicycles
