Portable Air Conditioner User Manual

Model: mini ac unit for bedroom-BaiCER | Brand: Generic

1. INTRODUCTION AND OVERVIEW

Thank you for choosing the Generic Portable Air Conditioner. This compact and versatile unit is designed to provide a comfortable environment by combining cooling, humidification, and air purification functions. Its lightweight design and easy-to-carry handle make it ideal for use in various settings, including your home, office, or during outdoor activities. This manual provides essential information for the safe and efficient operation of your new portable air conditioner.

Figure 1.1: The portable air conditioner in operation, demonstrating its cooling effect.

Key features include a multi-functional design suitable for dry environments, an easy-to-use push-button control panel, a large-capacity water tank for extended use, and an energy-saving, ultra-quiet operation that minimizes disturbance.

THIS SUMMER RELAX AND READ A BOOK

The circulating fan can circulate indoor air repeatedly to make the air fresh for a long time

2. SETUP AND INITIAL USE

2.1 Unpacking

Carefully remove all components from the packaging. Ensure you have the following items:

- 1x Portable Air Conditioner (Chiller)
- 1x Data Cable (for charging/power)
- 1x User Manual (this document)

2.2 Charging the Unit

Before first use, fully charge the built-in battery using the provided data cable. Connect the data cable to the unit's charging port and a compatible USB power source (e.g., wall adapter, computer USB port). The charging indicator light will show the charging status.

2.3 Filling the Water Tank

For cooling and humidification, the unit requires water. The large-capacity water tank can hold up to 1600 ml (54 oz) of water.

1. Locate the water tank on the unit.
2. Open the water tank cover.
3. Carefully pour clean, cool water into the tank. Do not exceed the maximum fill line.
4. For enhanced cooling, you may add ice cubes to the ice box compartment within the water tank.
5. Close the water tank cover securely.

Large capacity sterile water tank

Fine spray

3. OPERATING INSTRUCTIONS

3.1 Powering On/Off

Press the power button on the control panel to turn the unit on or off.

3.2 Adjusting Fan Speed

The unit features multiple fan speed settings to suit your comfort needs. Press the fan speed button to cycle through the available modes:

- **First Gear (Sleep Wind):** Gentle and comfortable, ideal for quiet environments or during sleep.
- **Second Gear (Natural Wind):** Refreshing and natural, suitable for office or study.
- **Third Gear (Super Gale):** Powerful airflow for rapid cooling in hot weather.

THE SIZE OF THE AIR VOLUME CONTROL

FIRST GEAR SLEEP WIND

Gentle and comfortable
for lunch break

SECOND GEAR NATURAL WIND

Suitable for office study
refreshing and natural

THIRD GEAR SUPER GALE

Suitable for rapid cooling
in hot weather

3.4 Special Features

- **Auto Shut-Off:** The unit may have an automatic shut-off feature for safety or when the water level is low.
- **Low Water Indicator:** An indicator will alert you when the water tank needs refilling.
- **Silent Operation:** Designed for low noise output (approximately 50 dB), ensuring minimal disturbance.

A FRESH BREEZE BRUSHED ONE'S FACE. LOW NOISE AND NO FUSS

20dB(A) Minimum working sound Fresh breeze
on your face, sleep through the night

Figure 3.3: The unit's low noise level ensures a peaceful environment.

4. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your portable air conditioner.

4.1 Cleaning the Water Tank

To prevent mold or mildew buildup, it is recommended to clean the water tank regularly, especially if the unit is used frequently or with tap water.

1. Turn off and unplug the unit.
2. Empty any remaining water from the tank.
3. Wipe the inside of the tank with a soft cloth and mild detergent.
4. Rinse thoroughly with clean water.
5. Allow the tank to air dry completely before refilling or storing the unit.

4.2 Exterior Cleaning

Wipe the exterior of the unit with a soft, damp cloth. Do not use abrasive cleaners or solvents.

5. TROUBLESHOOTING

If you encounter issues with your portable air conditioner, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not turn on	Battery is low or depleted Power cable not connected	Charge the unit fully Ensure data cable is securely connected
No cool air/Mist not visible	Water tank is empty No ice added (for colder mist)	Refill water tank Add ice cubes to the ice box
Unusual noise	Unit not on a flat surface Obstruction in fan/air intake	Place unit on a stable, flat surface Check for and remove any obstructions
Low water indicator is on	Water level is low	Refill the water tank
