## eeTao SAW30A-190-1500U

# eeTao 15V-24V AC/DC Adapter Charger User Manual

Compatible with Takki S81 and S81 Max Portable Power Stations

## 1. INTRODUCTION

---

This manual provides essential instructions for the safe and efficient use of your eeTao 15V-24V AC/DC Adapter Charger. This adapter is specifically designed to be compatible with Takki S81 and S81 Max Portable Power Stations, providing a reliable power supply for charging your device.

## 2. SAFETY INFORMATION

---

Please read and understand all safety warnings and instructions before using this product. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- The adapter supports a wide input voltage range of 100-240VAC at 50/60Hz, making it suitable for worldwide use.
- This charger incorporates multiple protection features: OVP (Over Voltage Output Protection), OCP (Over Current Output Protection), and SCP (Short Circuit Output Protection) to ensure safe operation.
- The product meets CE and RoHS specifications, indicating compliance with European safety, health, and environmental protection standards.
- **Important Note on Batteries:** Rechargeable batteries have a limited lifespan, typically 1 to 3 years. If your power station's battery is old or completely depleted, it may no longer accept a charge. This is a characteristic of the battery itself and not an indication of a fault with the charger. If you suspect a battery issue, a voltmeter can be used to verify the charger's output functionality.

# Security Protection

Multiple professional protection, so that fast charge more safe

Image: Diagram illustrating the multiple security protection features of the adapter, including temperature, overcharge, lightning, short circuit, and anti-interference protection.

## 3. PACKAGE CONTENTS

Verify that all items are present upon opening the package:

- 1 x eeTao 15V-24V AC/DC Adapter Charger (Model: SAW30A-190-1500U)

## 4. SETUP

Follow these steps to set up your adapter for charging:

1. **Connect to Power Station:** Insert the barrel connector of the adapter's DC output cable into the

charging input port of your Takki S81 or S81 Max Portable Power Station. Ensure a firm connection.

2. **Connect to Wall Outlet:** Plug the AC input prongs of the adapter into a standard 100-240VAC wall outlet.

## eeTao<sup>®</sup> Power Supply Adapter Compatible with:

### **Machine Not Included**

Image: The eeTao power supply adapter is compatible with Takki S81 (24000mAh) and S81 Max (30000mAh) portable power stations. Note: Power stations are not included.

Image: A side view of the eeTao AC/DC adapter, highlighting its compact design and the barrel connector for device input. The product label with model number SAW30A-190-1500U is visible.

## 5. OPERATING INSTRUCTIONS

Once properly connected, the adapter will begin supplying power to your Takki portable power station.

- The power station's charging indicator (if available) should activate, confirming that charging is in progress.
- Refer to your Takki S81 or S81 Max power station's user manual for specific charging status indicators and estimated charging times.
- It is generally recommended to charge the power station in a well-ventilated area.

## 6. MAINTENANCE

To ensure the longevity and optimal performance of your eeTao adapter, follow these maintenance guidelines:

- **Cleaning:** Keep the adapter and its cable clean and free from dust and debris. Use a soft, dry cloth for cleaning. Do not use liquid cleaners.

- **Storage:** Store the adapter in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Cable Care:** Avoid bending or crimping the cable excessively, especially near the connectors, to prevent internal damage.
- **No Disassembly:** Do not attempt to open or repair the adapter. This will void the warranty and could lead to electrical hazards.

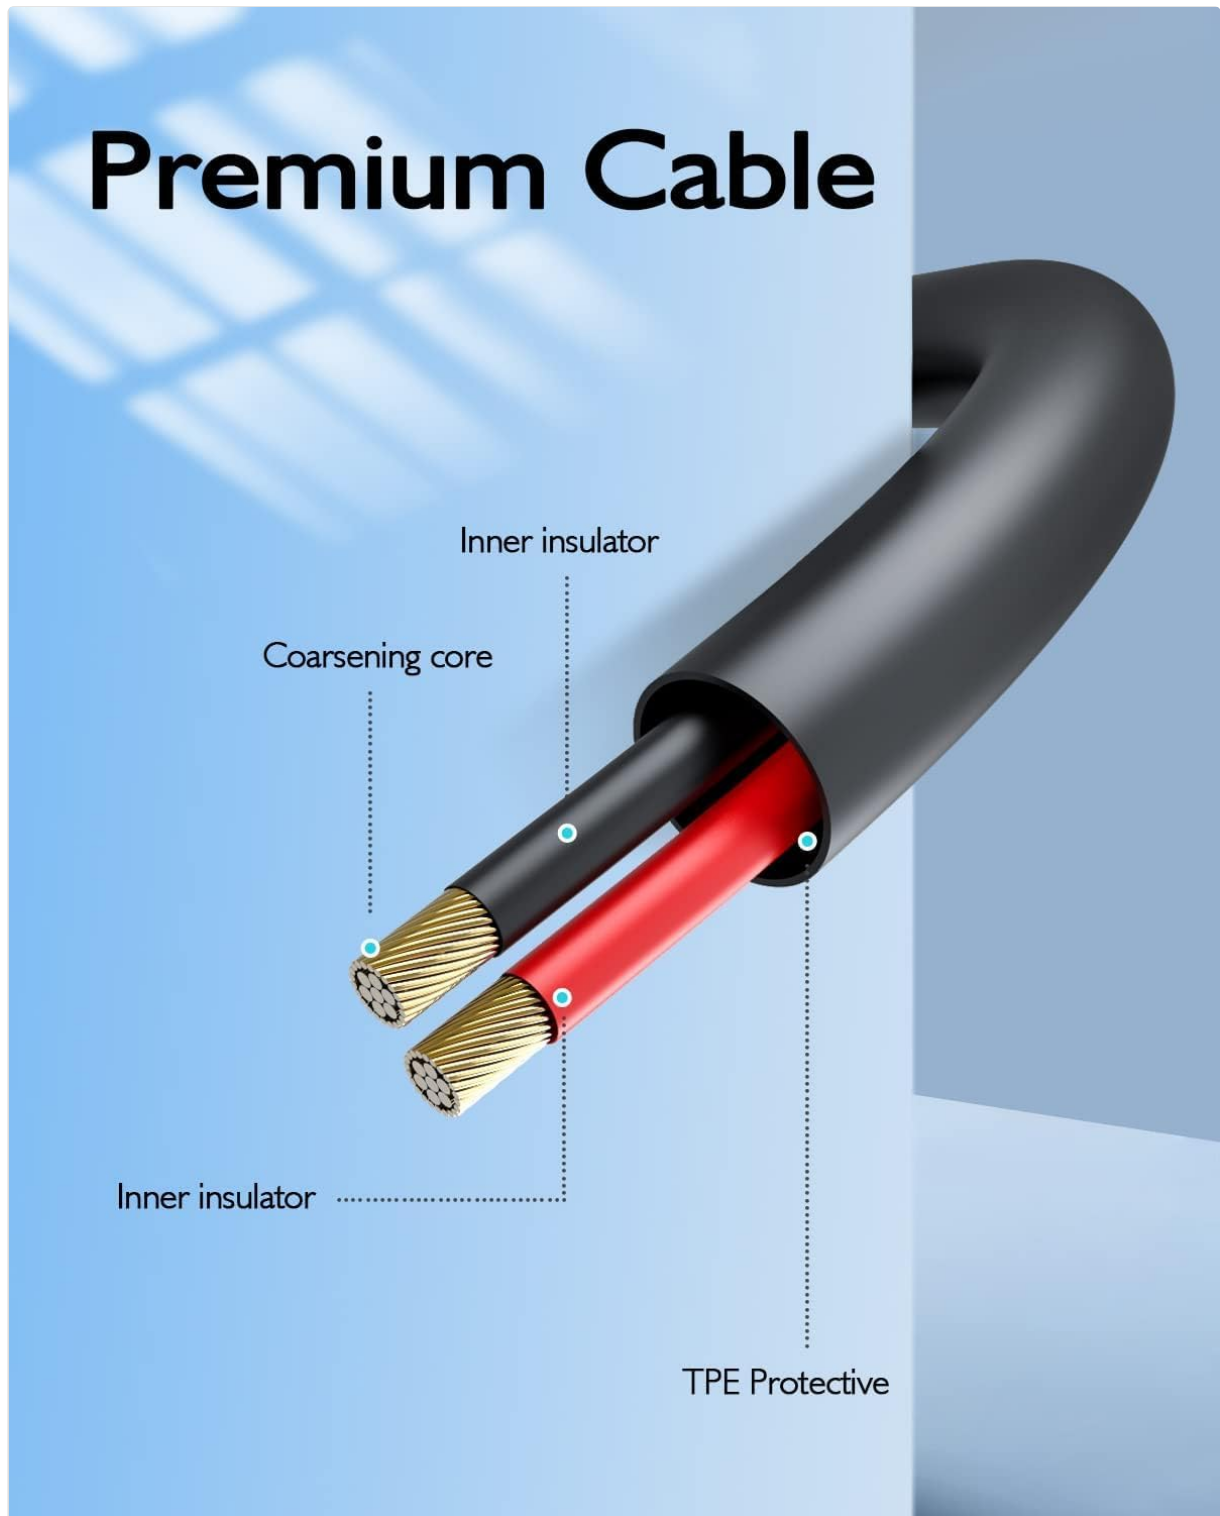

Image: An illustration detailing the construction of a premium cable, featuring an inner insulator, coarsening core for enhanced conductivity, and a durable TPE protective outer layer.

## 7. TROUBLESHOOTING

If you encounter issues while using your eeTao adapter, refer to the following common troubleshooting

steps:

- **Power Station Not Charging:**
  - Ensure the adapter's barrel connector is fully inserted into the power station's charging port.
  - Verify that the adapter is securely plugged into a functional wall outlet. Test the outlet with another device if necessary.
  - Confirm that the power station itself is turned on or in a state that allows charging, as per its own manual.
  - As mentioned in the safety section, an old or dead power station battery may not accept a charge. This is a battery limitation, not a charger defect.
- **Adapter Feels Warm:** It is normal for the adapter to become slightly warm during operation. If it becomes excessively hot or emits a burning smell, immediately unplug it from the wall outlet and discontinue use.
- **No Power Output:** If you suspect the adapter is not providing power, use a voltmeter to test the DC output voltage at the barrel connector. It should read approximately 19V DC.

## 8. SPECIFICATIONS

Feature	Specification
Brand	eeTao
Model Number	SAW30A-190-1500U
Input Voltage	100-240VAC, 50/60Hz
Output Voltage	19V DC
Output Current	1.5 Amps
Maximum Power	28.5 Watts
Connector Type	Barrel
Safety Standards	CE, RoHS, OVP, OCP, SCP
Material	Metal, Plastic
Item Dimensions	3 x 3 x 1 inches

## 9. WARRANTY AND SUPPORT

eeTao stands behind the quality of its products.

- **Warranty:** This product is covered by a 30-day refund policy and a 24-month exchange warranty from the date of purchase.
- **Customer Support:** For any questions, technical assistance, or warranty claims, please contact eeTao customer service through the retailer where the product was purchased.
