Tribesigns XK-00283

Tribesigns Large Shoe Cabinet with Doors (Model XK-00283)

User Instruction Manual

1. PRODUCT OVERVIEW

The Tribesigns Large Shoe Cabinet is a 6-tier entryway storage solution designed to organize up to 30 pairs of shoes. Featuring a classic white finish, gold polished legs, and slim metal handles, it offers both functionality and a modern aesthetic. This versatile cabinet can be used in various rooms, including hallways, living rooms, and bedrooms.

Key Features:

- **Spacious Storage:** Accommodates 25-30 pairs of shoes across 6 tiers.
- **Adjustable Shelves:** Five internal shelves with three adjustable positions each (6.37 inches apart) for various shoe types, including boots and heels.
- **Durable Construction:** Crafted from high-quality particleboard and metal legs, supporting up to 220 lbs.
- **Ventilation:** Two vent holes on the back panel promote air circulation and reduce odors.
- **Safety Features:** Includes anti-toppling devices for enhanced stability and adjustable feet to protect flooring.
- **Design:** Classic white finish with gold accents and carved door designs.

2. SETUP AND ASSEMBLY

Assembly is required for this product. Please follow the instructions carefully. It is recommended to have a second person assist with assembly, especially for attaching doors.

Required Tools (Not Included):

- Phillips head screwdriver
- Hammer (optional, for dowels)

Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify that all numbered parts and hardware are present according to the included parts list.
2. **Identify Parts:** Match each component to its corresponding number in the instruction manual.
3. **Assemble Frame:** Follow the step-by-step diagrams to construct the main cabinet frame. Ensure all connections are secure. *Do not overtighten screws.*
4. **Install Shelves:** Insert the adjustable shelf pins into the desired positions. Place the shelves onto the pins.
5. **Attach Hinges to Doors:** It is recommended to attach the hinges to the cabinet doors first, before attaching the hinges to the main cabinet body. This can simplify the door installation process.
6. **Install Doors:** Carefully align the door hinges with the pre-drilled holes on the cabinet frame and secure them. Adjust as necessary for proper alignment.
7. **Attach Handles:** Secure the gold handles to the cabinet doors.
8. **Install Legs:** Attach the gold metal legs to the base of the cabinet. Ensure they are firmly secured.
9. **Secure Anti-Toppling Device:** For safety, attach the anti-toppling device to the back of the cabinet and secure it to a wall stud. This prevents accidental tipping.

3. OPERATING INSTRUCTIONS

Storing Shoes:

- Open the cabinet doors using the gold handles.
- Place shoes on the shelves. The cabinet is designed to hold various shoe sizes and types.
- For larger items like boots or high heels, adjust or remove shelves as needed.
- The bottom space beneath the cabinet can be used for slippers or to allow a robotic vacuum cleaner to pass.

Image: Close-up view highlighting the spacious top storage area with raised edges, the gold handles, and the clearance beneath the cabinet for cleaning or slippers.

Adjusting Shelves:

1. Empty the shelf you wish to adjust.
2. Remove the shelf pins from their current holes.

3. Reinsert the shelf pins into the desired new holes. Each shelf has three adjustable positions, approximately 6.37 inches apart.
4. Place the shelf back onto the pins.

4. MAINTENANCE

Cleaning:

- Wipe surfaces with a soft, damp cloth.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- For spills, clean immediately to prevent staining.

Odor Control:

- The cabinet features two vent holes on the back panel to aid in air circulation.
- Ensure these vents are not blocked to allow for proper airflow and help dissipate shoe odors.

Image: Close-up of the ventilation holes located on the back panel of the shoe cabinet, designed to improve air circulation.

General Care:

- Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- Avoid placing excessively heavy items on the shelves or countertop to prevent damage.
- Keep the cabinet away from direct sunlight and excessive moisture to preserve its material integrity.

5. TROUBLESHOOTING

Doors Are Misaligned or Do Not Close Properly:

- **Check Hinge Adjustment:** The hinges on the doors are adjustable. Refer to the assembly instructions or an online guide for adjusting cabinet door hinges. Small adjustments can often correct alignment issues.
- **Re-seat Hinges:** Ensure all screws securing the hinges to both the door and the cabinet frame are fully tightened. Loose screws can cause misalignment.
- **Verify Frame Squareness:** If the cabinet frame itself is not square, it can affect door alignment. Ensure the cabinet is on a level surface and that all frame connections are secure.

Cabinet Feels Unstable:

- **Check Leg Stability:** Ensure all four metal legs are securely attached and evenly supporting the cabinet. The adjustable feet can be used to level the cabinet on uneven floors.
- **Utilize Anti-Toppling Device:** Always install the included anti-toppling device and secure it to a wall stud. This is crucial for stability and safety, especially in households with children or pets.
- **Tighten All Fasteners:** Recheck all screws and cam locks throughout the cabinet structure. Loose fasteners can compromise overall stability.
