SETUP AND INSTALLATION

Installation of the Junsun Car Radio Stereo involves replacing your vehicle's existing head unit. It is recommended to consult a professional for installation if you are unfamiliar with car audio systems.

Compatibility Check

Ensure your vehicle is a Toyota Tacoma (3rd Generation) manufactured between 2016 and 2021.

General Installation Steps

1. Carefully remove the existing factory head unit and surrounding trim. You may need to transfer trim clips and air vents from the original unit to the new Junsun unit.
2. Connect the appropriate power harness to the vehicle's wiring. The unit comes with multiple harnesses; ensure you use the one that fits your vehicle's connectors.
3. Connect the GPS module, USB cables, RCA cables, and reversing line as needed. Refer to the wiring diagram for specific connections.
4. Mount the new Junsun Car Radio Stereo into the dashboard opening.
5. Reconnect the vehicle's battery and test the unit's functionality before fully reassembling the dashboard.

MAINTENANCE

To ensure the longevity and optimal performance of your Junsun Car Radio Stereo, follow these maintenance guidelines:

- Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- Software Updates:** Periodically check for system software updates through the unit's settings menu (if available). Keeping the software updated can improve performance and add new features.
- Environmental Conditions:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.

TROUBLESHOOTING

This section addresses common issues you might encounter with your Junsun Car Radio Stereo.

Backup Camera Displays Multiple Images or Poor Quality

If your backup camera displays multiple images, is blurry, or shows in black and white, it is likely a setting configuration issue, not a defect.

Solution: Adjust the backup camera format in the system settings.

1. Go to **Settings**.
2. Select **Car Infotainment**.
3. Tap **About Device**.
4. Enter the settings code: **8888**.
5. Select **Backcar Setup**.
6. Adjust **camtype/camformat** to match your specific backup camera's format. You may need to try different options (e.g., CVBS, NTSC, PAL) until the image displays correctly.

Steps to configure backup camera settings.

USB Port Not Functioning

If the USB port is not working, ensure all wiring connections are secure and correctly installed. Verify that the factory USB cable is properly connected to the head unit using the supplied adapter.

Bluetooth Volume Issues

If Bluetooth audio volume is too low or inconsistent with other audio sources, check the individual volume settings within the Bluetooth application and the main system volume. Some devices may require volume adjustments directly on the paired phone.

Steering Wheel Controls Not Working

Ensure the Can Bus decoder is correctly connected and configured. Access the steering wheel control settings in the unit's menu to manually program or re-learn the button functions.
