3. SETUP AND INSTALLATION

3.1 Compatibility Check

This unit is specifically designed for Nissan Juke models from 2011 to 2017. Before proceeding with installation, it is crucial to verify compatibility with your vehicle's original head unit and wiring harness. Compare your original unit with the images provided below.

ATTENTION PLEASE!!!

Please check your original unit and make sure yours same as the correct one before your purchase!!! According to some cumsters's feedback, sometimes the default wire harness will not match, but we have the correct wire harness as well, so better take a photo of your original unit's back before your purchase! If you don't will, we offer free change when you meet this problem, but it takes time!!!

Figure 3.1: Verify your original unit's appearance for compatibility.

Important: If your original unit's back wiring harness does not match the default wire harness provided, please take a photo of your original unit's back and contact customer support for assistance. A correct wire harness may be required.

3.2 Installation Steps

1. **Preparation:** Turn off the vehicle's ignition and disconnect the negative terminal of the car battery to prevent electrical shorts.

2. **Remove Original Unit:** Carefully use the provided crowbar tool to pry open the trim panels around your original car stereo. Unscrew and remove the original head unit.
3. **Connect Wiring:**
 - Connect the main power cable harness to the vehicle's wiring.
 - Connect the GPS antenna and position it in a location with a clear view of the sky (e.g., dashboard).
 - Connect the USB port cables for external devices.
 - Connect the RCA expand cable and the RCA connector for the reverse camera, if installing the included AHD reverse camera.
 - Connect the external microphone for improved call quality.
 - Ensure all connections are secure.
4. **Install New Head Unit:** Carefully slide the KUNFINE head unit into the dashboard opening. Secure it with screws.
5. **Reassemble:** Reattach the trim panels.
6. **Reconnect Battery:** Reconnect the negative terminal of the car battery.
7. **Test:** Turn on the ignition and test the unit's functions.

4. OPERATING INSTRUCTIONS

4.1 Power On/Off and Basic Navigation

Press and hold the power button (usually integrated into one of the knobs) to turn the unit on or off. The QLED touch screen allows for intuitive navigation through menus and applications. Swipe left/right or tap icons to access different functions.

4.2 Dual Display Knobs

The unit features dual display knobs for enhanced control and safety while driving. These knobs provide physical feedback and display numerical information, allowing for quick adjustments without diverting attention from the road.

Figure 4.1: Dual Display Knobs for quick and safe operation.

4.3 CarPlay / Android Auto

Seamlessly integrate your iOS or Android smartphone with the car stereo. Connect your device via USB or wirelessly (if supported by your phone and the unit) to access navigation, music, calls, and messages through the unit's interface. Use voice commands for a safer driving experience.

4.7 Bluetooth and Wi-Fi Connectivity

Connect your smartphone via Bluetooth for hands-free calling and audio streaming. The integrated Wi-Fi allows you to connect to a mobile hotspot or home Wi-Fi network for internet access, app downloads, and online services.

5. MAINTENANCE

To ensure the longevity and optimal performance of your KUNFINE car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid abrasive materials or harsh chemicals.
- **Software Updates:** Periodically check for software updates through the unit's settings or the manufacturer's website. Keeping the software updated can improve performance and add new features.

- **Temperature:** Avoid exposing the unit to extreme temperatures, both hot and cold, for extended periods.
- **Connections:** Ensure all cables and connections remain secure. Loose connections can lead to intermittent issues.

6. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	Loose power connection, blown fuse, incorrect wiring.	Check power cable connections. Inspect vehicle's fuse box for blown fuses. Verify wiring against installation diagram.
No sound.	Volume too low, mute activated, speaker wiring issue.	Increase volume. Check if unit is muted. Verify speaker wire connections.
GPS signal lost or inaccurate.	GPS antenna obstructed or improperly placed.	Ensure GPS antenna has a clear view of the sky. Check antenna connection.
CarPlay/Android Auto not connecting.	Incorrect USB cable, phone settings, software incompatibility.	Use a high-quality USB data cable. Check phone's CarPlay/Android Auto settings. Ensure phone OS is updated.
Touch screen unresponsive.	Temporary software glitch, screen damage.	Restart the unit. If issue persists, contact support.

If the problem persists after attempting these solutions, please contact KUNFINE customer support for further assistance.
