VOOPOO Argus A 30W Pod Kit User Manual

Model: VOOPOO-ARGUS A-UK

1. INTRODUCTION

Thank you for choosing the VOOPOO Argus A 30W Pod Kit. This device is designed for an optimal vaping experience, featuring a powerful built-in 1100mAh battery and versatile Argus Top-filled Cartridges. Please read this manual thoroughly before using the device to ensure proper operation and maintenance.

The Argus A Pod Kit is a compact and efficient electronic cigarette vaporizer, offering adjustable wattage and a user-friendly interface. It is designed for use with e-liquids (not included).

2. SAFETY INFORMATION AND WARNINGS

Important Safety Warning:

The following warning applies only when the product is used with nicotine-containing e-liquid: This product contains nicotine which is a highly addictive substance. Keep this product out of the reach of children. This product is not recommended for non-smokers.

- Do not expose the device to extreme temperatures (hot or cold) or direct sunlight.
- Do not immerse the device in water or any other liquids.
- Use only original VOOPOO Argus cartridges and charging cables.
- Do not attempt to disassemble or repair the device yourself. Contact customer support if issues arise.
- Ensure the cartridge is securely installed before use to prevent leakage.
- Dispose of the device and battery responsibly according to local regulations.

3. PACKAGE CONTENTS

Upon opening your VOOPOO Argus A 30W Pod Kit package, please verify that all components are present:

- 1 x Argus A Device (Built-in 1100mAh Battery)
- 1 x Argus Top-filled Cartridge (0.7ohm)
- 1 x Argus Top-filled Cartridge (0.4ohm)
- 1 x USB Type-C Charging Cable
- 1 x User Manual (This document)

4. DEVICE OVERVIEW

Familiarize yourself with the different parts of your Argus A device:

- **Pod Cartridge:** Houses the coil and e-liquid. Top-filled design for easy refilling.
- **Device Body:** Contains the battery, chipset, and control buttons.
- **Display Screen:** Shows wattage, battery level, coil resistance, and puff count.
- **Power Button:** For device activation and wattage adjustment.

- **On/Off Slider:** Physical switch for quick device power control.
- **USB Type-C Port:** For charging the device.

5. SETUP GUIDE

5.1 Charging the Device

1. Connect the USB Type-C cable to the charging port on the device.
2. Connect the other end of the cable to a suitable USB power adapter (5V/1A recommended).
3. The display will indicate the charging status. The device is fully charged when the battery indicator shows full.

5.2 Filling the Cartridge

The Argus A Pod Kit uses top-filled cartridges for convenience.

1. Remove the pod cartridge from the device.
2. Locate the silicone stopper on the top of the cartridge.
3. Carefully open the stopper and insert the nozzle of your e-liquid bottle into the filling port.
4. Fill the cartridge with e-liquid, ensuring not to overfill. The maximum capacity is 3ml.
5. Securely close the silicone stopper.
6. *Important:* For a new cartridge, let it stand for 5-10 minutes after filling to allow the coil to saturate with e-liquid. This prevents dry hits and extends coil life.

The infographic is divided into three main sections. The top left section, titled 'Upgraded Longevity', features a large image of the Argus A cartridge and the text '90 mL Extra-long Lifespan'. The top right section, titled 'Upgraded Leakproof', shows a cross-section of the cartridge's internal mechanism and the text 'Leak-free for 30 Days of Standing'. The bottom right section, titled 'Upgraded Flavor', displays two cartridges and the text 'Rich and Intense Flavor'. A central circular badge with a green and white design contains the text 'LONGEVITY', 'LEAKPROOF', '3X UPGRADE', and 'FLAVOR'. At the bottom, a disclaimer states: '* Some data may vary depending on test environment.'

Image: Illustration of the Argus A cartridge highlighting its upgraded longevity (90ml extra-long lifespan), leakproof design (leak-free for 30 days of standing), and upgraded flavor for a rich and intense experience.

5.3 Installing the Cartridge

Once filled, insert the cartridge back into the device. It will be held in place by strong magnets. Ensure it clicks firmly into place.

6. OPERATING INSTRUCTIONS

6.1 Power On/Off

Use the physical On/Off slider switch located on the side of the device to power it on or off.

6.2 Adjusting Wattage

The Argus A features adjustable wattage up to 30W. The device offers different modes:

- **SUPER Mode:** Automatically matches the optimal output power for full-bodied flavor.
- **POWER Mode:** Allows manual adjustment of output power to your preference.
- **ECO Mode:** Matches energy-saving power for extended battery life.

To adjust wattage or switch modes, refer to the on-screen prompts and use the power button as indicated by the device's interface.

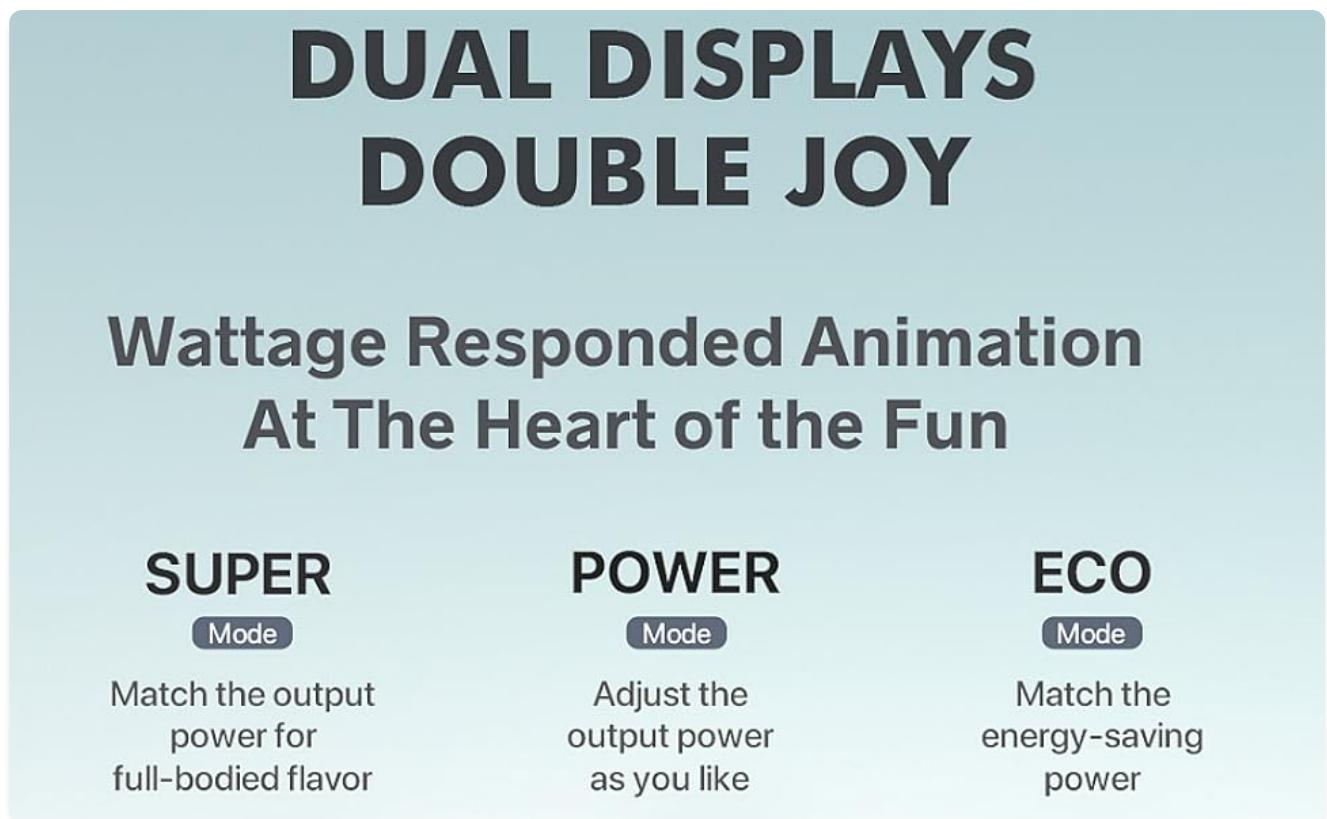

Image: The VOOPOO Argus A's dual display, illustrating the "SUPER", "POWER", and "ECO" modes and their respective functions for flavor, adjustable output, and energy saving.

6.3 Vaping

The Argus A supports both button-activated and auto-draw vaping, depending on the specific cartridge and settings. Simply inhale from the mouthpiece or press the power button while inhaling.

6.4 Screen and Lights On/Off

The device allows you to control the screen and indicator lights. Refer to the device's menu or button combinations for this function, as detailed on the display.

7. MAINTENANCE

7.1 Cleaning the Device

- Regularly wipe the device body with a dry, soft cloth to remove dust and fingerprints.
- If e-liquid leaks into the pod connection area, gently clean it with a cotton swab or tissue. Ensure the area is dry before reinserting the cartridge.
- Do not use harsh chemicals or abrasive cleaners.

7.2 Replacing the Cartridge

The Argus cartridges are designed to be replaced when the flavor diminishes or a burnt taste occurs. This typically happens after several refills or prolonged use.

1. Remove the old cartridge from the device.
2. Dispose of the old cartridge responsibly.
3. Fill a new Argus Top-filled Cartridge with your preferred e-liquid (refer to Section 5.2).
4. Insert the new cartridge firmly into the device.

7.3 Battery Care

- Avoid completely draining the battery before recharging.
- Do not leave the device charging unattended for extended periods.
- Store the device in a cool, dry place when not in use.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
No vapor/Device not firing	Battery is low or dead. Cartridge not properly installed. Coil is burnt out or faulty. Device is off.	Charge the device. Reinstall the cartridge firmly. Replace the cartridge. Turn on the device using the slider switch.
Burnt taste	E-liquid level is too low. Coil is dry or burnt. Wattage setting is too high.	Refill the cartridge. Replace the cartridge. Lower the wattage setting.
Leaking	Cartridge not properly sealed. Overfilling the cartridge. Damaged cartridge.	Ensure silicone stopper is closed. Avoid overfilling. Replace the cartridge.
Device not charging	Faulty cable or adapter. Charging port is dirty.	Try a different USB-C cable and adapter. Clean the charging port gently.
