General Care:

- Avoid placing hot items directly on the desktop. Use coasters or protective pads.
- Keep the desk away from direct sunlight and extreme temperature changes to prevent warping or discoloration.
- Regularly check all connections and tighten screws if necessary to ensure stability.

7. TROUBLESHOOTING

Common Issues and Solutions:

- **Desk is Wobbly:**

Ensure all screws are fully tightened. Check that the desk is on a level surface. If not, adjust the floor levelers on the bottom of the legs if available, or place shims under the legs.

- **Screws Do Not Fit/Align:**
Double-check that you are using the correct screws for each step as indicated in the instructions and package contents. Sometimes, screws may appear too large for holes if the part is not perfectly aligned or if the internal threading is slightly off. Try re-aligning the parts and gently wiggling the screw while turning. If a screw still does not fit, verify you have the correct part and contact customer support for assistance.
- **Drawers Do Not Slide Smoothly:**
Ensure the fabric drawers are correctly assembled and the bottom panel is fully inserted. Check for any obstructions within the drawer frames. The fabric drawers are designed to be inserted and removed easily, not to slide on rails.
- **Missing or Damaged Parts:**
If you find any parts missing or damaged upon opening the package, please do not attempt to assemble the desk. Contact SMUG customer service immediately with your purchase details for replacement parts.
