2. **Connect to Power Source:** Insert the USB Type-A end of the cable into a compatible USB power source. Recommended power sources include:
 - Computer USB port (recommended for optimal safety)
 - Power bank
 - Car adapter
 - USB wall adapter (ensure output is less than 5V/1A)
3. **Connect to Smartwatch:** Align the magnetic charging connector with the charging pins on the back of your smartwatch. The magnets will help secure the connection.

4. OPERATING INSTRUCTIONS (CHARGING)

Once connected, your smartwatch should indicate that it is charging. The cable is designed with a voltage regulator and PTC (Positive Temperature Coefficient) to protect your device during the charging process.

Important Charging Notes:

- For optimal safety and to prevent damage to your smartwatch, **do not use a USB wall adapter with an output exceeding 5V/1A.**
- Using a computer's USB port for charging is the recommended method.
- The cable ensures stable current transmission for reliable charging.

5. SAFETY PRECAUTIONS

- Always use a power source that meets the specified voltage and current requirements (less than 5V/1A).
- Avoid exposing the cable to extreme temperatures or direct sunlight.
- Do not attempt to disassemble or modify the charger cable.
- Keep the magnetic connector clean and free from metallic debris to ensure proper contact.
- This cable is designed for outdoor use, but avoid prolonged exposure to harsh weather conditions.

7. TROUBLESHOOTING

• Smartwatch not charging:

- Ensure the magnetic connector is properly aligned with the smartwatch's charging pins.
- Verify that the USB end is securely connected to a working power source.
- Try a different USB port or power source.
- Check if the power source output is within the recommended specifications (less than 5V/1A).
- Inspect the cable for any visible damage.

• Cable does not fit my smartwatch:

- Double-check the compatibility list in Section 2 to ensure your smartwatch model is supported.
- If your model is listed and the cable still does not fit, contact customer support for assistance.

• Slow charging:

- Ensure you are using a stable power source, preferably a computer USB port.
- Avoid using power sources with very low current output.
