## About Your Watch

The Michael Kors Maritime Black Watch MK9181 features a 42mm case, a black glossy dial, and a three-hand quartz movement. It is designed with a durable black stainless steel bracelet, offering both style and functionality.

- 42mm case, 22mm band width, mineral crystal.
- Quartz movement with 3-hand analog display.
- Round stainless steel case with a black dial.
- Black stainless steel bracelet.

## SETUP GUIDE

### Setting the Time and Date

To set the time and date on your Michael Kors Maritime Black Watch MK9181, follow these steps:

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to position 2 for setting the date, or to position 3 for setting the time.

2. **Set the date:** If in position 2, turn the crown clockwise or counter-clockwise until the correct date appears in the date window.
3. **Set the time:** If in position 3, turn the crown to move the hands clockwise until the correct time is displayed. Ensure you set the correct AM/PM for the date change to occur at midnight.
4. **Push in the crown:** Once the time and date are set, push the crown back into position 1 (normal operating position) to start the watch movement.

## OPERATING YOUR WATCH

---

### Reading the Time

Your Michael Kors Maritime Black Watch MK9181 features a classic analog display with three hands:

- The **hour hand** is the shortest hand and indicates the hour.
- The **minute hand** is longer than the hour hand and indicates the minutes.
- The **second hand** is the thinnest and often sweeps or ticks to indicate seconds.

The date window displays the current day of the month.

## CARE AND MAINTENANCE

---

Proper care will extend the life and maintain the appearance of your Michael Kors watch.

### Cleaning

- Wipe the watch case and bracelet regularly with a soft, dry cloth to remove dust and dirt.
- For stainless steel, a slightly damp cloth can be used, followed by a dry cloth. Avoid harsh chemicals or abrasive materials.

### Water Resistance

This watch has a specific level of water resistance. Refer to the specifications section for details. Always ensure the crown is fully pushed in before exposing the watch to water. Avoid operating the crown or pushers when the watch is wet.

### Battery Replacement

The watch is powered by a quartz movement requiring a battery. When the watch stops or the second hand begins to jump erratically (indicating low battery), it is time for a battery replacement. It is

recommended to have the battery replaced by an authorized service center to ensure proper sealing and maintain water resistance.

## Storage

When not wearing your watch, store it in a cool, dry place, away from direct sunlight and extreme temperatures. The original watch box can be used for safe storage.

## TROUBLESHOOTING

If you encounter issues with your Michael Kors Maritime Black Watch MK9181, refer to the common problems and solutions below:

Problem	Possible Cause	Solution
Watch has stopped	Depleted battery	Replace the battery at an authorized service center.
Time is incorrect	Crown not fully pushed in; Time not set correctly	Ensure crown is fully pushed in. Reset the time as per 'Setting the Time and Date' section.

Problem	Possible Cause	Solution
Date does not change at midnight	AM/PM not set correctly	Advance the time by 12 hours to correct the AM/PM cycle.
Condensation under crystal	Exposure to extreme temperature changes or moisture ingress	Contact an authorized service center immediately. Do not attempt to dry the watch yourself.

If the problem persists after attempting these solutions, please contact an authorized Michael Kors service center.
