# Michael Kors Sylvia Rose Gold Watch MK4656

## User Instruction Manual

---

### 1. INTRODUCTION

---

Thank you for choosing the Michael Kors Sylvia Rose Gold Watch MK4656. This elegant timepiece features a 33mm rose gold-plated stainless steel case with pavé detailing on the dial and top ring, extending to the bracelet links. The mother-of-pearl dial and quartz movement ensure precise timekeeping and sophisticated style. This manual provides essential information for the proper setup, operation, and care of your watch.

## 2. SETUP

### 2.1 Setting the Time

- 1. Pull out the crown:** Gently pull the crown (the small knob on the side of the watch case) to the outermost position. You may feel a slight click.
- 2. Adjust the time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the correct time.
- 3. Push in the crown:** Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

## 2.2 Adjusting the Bracelet

The rose gold-plated stainless steel bracelet features a 2-pusher foldover clasp closure. For initial fitting or significant adjustments, it is recommended to visit a professional jeweler to add or remove links. The bracelet is interchangeable with other Michael Kors 16mm watch straps.

### 3. OPERATING THE WATCH

Your Michael Kors Sylvia watch is designed for reliable timekeeping with its quartz movement. Once the time is set, the watch will operate continuously until the battery requires replacement.

#### 3.1 Water Resistance

This watch is water resistant to 50 meters (165 feet). This rating makes it suitable for short periods of recreational swimming and showering. However, it is *not* suitable for diving or snorkeling. Avoid operating the crown or pushers while the watch is wet or submerged to prevent water intrusion.

### 4. MAINTENANCE

#### 4.1 Cleaning Your Watch

- Wipe the watch case and bracelet with a soft, damp cloth.
- For stainless steel components, a mild soap solution can be used, followed by rinsing with clean water and drying thoroughly.

- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the finish and seals.

## 4.2 Battery Replacement

The watch uses 1 product-specific battery (included). When the watch stops running or the hands move erratically, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and maintain water resistance.

## 4.3 Storage

When not in use, store your watch in a dry, cool place, away from direct sunlight and extreme temperatures. The original watch box can be used for storage.

## 5. TROUBLESHOOTING

### 5.1 Watch Not Running

- **Check the crown:** Ensure the crown is fully pushed in against the watch case. If it is pulled out, the watch will not run.
- **Battery:** The battery may be depleted. Refer to Section 4.2 for battery replacement information.

### 5.2 Inaccurate Timekeeping

- **Magnetic fields:** Exposure to strong magnetic fields can affect quartz watch accuracy. Keep the watch away from magnets.
- **Battery:** A low battery can cause the watch to run slow or irregularly.
- **Impact:** Severe impacts can damage the internal movement. If the issue persists after checking the above, professional inspection is recommended.
