DaToo DT-638

DaToo Automatic Fish Feeder DT-638 Instruction Manual

Model: DT-638 | Brand: DaToo

1. PRODUCT OVERVIEW

The DaToo Automatic Fish Feeder DT-638 is designed to simplify fish feeding for aquarium owners, especially during busy periods or vacations. It features intelligent feeding modes, allowing for precise control over feeding frequency and amount. The innovative airflow moisture-proof function ensures that fish food remains dry and fresh, preventing caking and spoilage. With multiple installation options, this feeder is versatile and easy to integrate into various aquarium setups.

4. SETUP & INSTALLATION

The DaToo Automatic Fish Feeder offers three convenient mounting options to suit various aquarium designs. Choose the method that best fits your tank:

1. Method 1: Adjustable Clamp Base (Horizontal)

Attach the feeder to the wall of your tank using the adjustable clamp base in a horizontal orientation. Ensure the clamp is securely fastened to the tank rim.

2. Method 2: Adjustable Clamp Base (Vertical)

For semi-open aquariums, the adjustable clamp base can be used to clip the feeder to the lid in a vertical orientation. This provides stable support and proper food dispensing.

3. Method 3: Sticker Base

Utilize the provided sticker base to adhere the feeder directly to your tank's feeding port or a flat surface near it. Ensure the surface is clean and dry before applying the sticker for optimal adhesion.

5.2 Precise Customized Feeding Amount

Adjust the amount of food dispensed to match your aquarium size and the number of fish. The feeder provides 8 levels of feeding amount options:

- Simply slide the toggle on the feeder to select the desired feeding level.
- Start with a lower setting and observe your fish's consumption to determine the optimal amount, preventing overfeeding and maintaining water quality.

6. MAINTENANCE

6.1 Airflow Moisture-Proof Function

The feeder is equipped with an air hole designed to prevent moisture buildup in the food chamber:

- Connect an air hose and air pump (not included) to this air hole to deliver a constant flow of fresh, dry air.
- This feature helps avoid food from getting damp, caked, or spoiled, ensuring your fish always receive healthy and safe food.
- The hidden feeding port further protects the food from water droplets, dust, and dirt.

AIRFLOW MOISTURE PROOF FUNCTION

Moisture-Proof Air Hole

Connect air tube and air pump to deliver dry air to the feeder to avoid moisture, lumps and spoilage of food.

Hidden Feeding Port

Effectively prevents water droplets, dust and dirt from falling into the food, so your fish will always eat healthy, safe fresh food!

6.2 Cleaning Instructions

To ensure the longevity and proper functioning of your feeder, follow these cleaning guidelines:

- The feeder unit should be cleaned by **hand wash only**.
- Do not submerge the electronic components in water.
- Regularly check the food chamber and dispensing mechanism for any residue or blockages and clean as needed.

7. TROUBLESHOOTING

If you encounter any issues with your DaToo Automatic Fish Feeder, please review the following common scenarios:

- **Feeder Not Dispensing Food:** Check if the food chamber is empty or if the food is caked. Ensure batteries are correctly installed and have sufficient charge.

- **Incorrect Feeding Amount:** Verify the feeding amount setting on the toggle. Adjust as necessary.
- **Food Getting Damp:** Ensure the moisture-proof air hole is clear and consider connecting an air pump if humidity is high.

For persistent issues or problems not listed here, please contact customer support.

8. WARRANTY & SUPPORT

DaToo stands behind the quality of its products. Your Automatic Fish Feeder DT-638 comes with ~~a~~**one-year warranty** from the date of purchase.

We are committed to providing excellent customer service. If you have any questions, concerns, or require assistance with your product, please do not hesitate to contact our professional customer service team, available **24 hours** a day. Your satisfaction is our priority.
