LAFAER EC-SL380

LAFAER Motion Sensor Under Cabinet Light

MODEL: EC-SL380 USER MANUAL

Thank you for choosing the LAFAER Motion Sensor Under Cabinet Light. This manual provides essential information for safe and efficient use of your product. Please read it thoroughly before installation and operation.

1. Package Contents

Verify that all items are present in your package:

- 1 x LAFAER Motion Sensor Under Cabinet Light (Model EC-SL380)
- 1 x Mounting Hardware (includes metal base with adhesive and screws)
- 1 x Type-C Charging Cable
- 1 x Instruction Manual (this document)

2. Product Overview

The LAFAER Motion Sensor Under Cabinet Light features an adjustable lamp with a digital display for easy monitoring and control.

2.1 Components

- **Light Bar:** Contains LED lights and a magnetic surface for attachment.
- **Control Module:** Houses the motion sensor, digital display, and control buttons. This section can rotate relative to the light bar.
- **Mounting Base:** A metal base that can be attached to surfaces using adhesive or screws, providing a magnetic attachment point for the light.
- **USB-C Port:** For charging the internal battery.

2.2 Digital Display Indicators

The intuitive digital display provides real-time information:

- **Battery Level:** Shows remaining power percentage.
- **Sensing Mode:** Indicates the currently active motion sensing mode (Constant On, Night Sensing, All-Day Sensing).
- **Brightness Level:** Displays the selected brightness percentage (25%, 50%, 75%, 100%).
- **Color Temperature:** Shows the active color temperature (3000K, 4500K, 6500K).

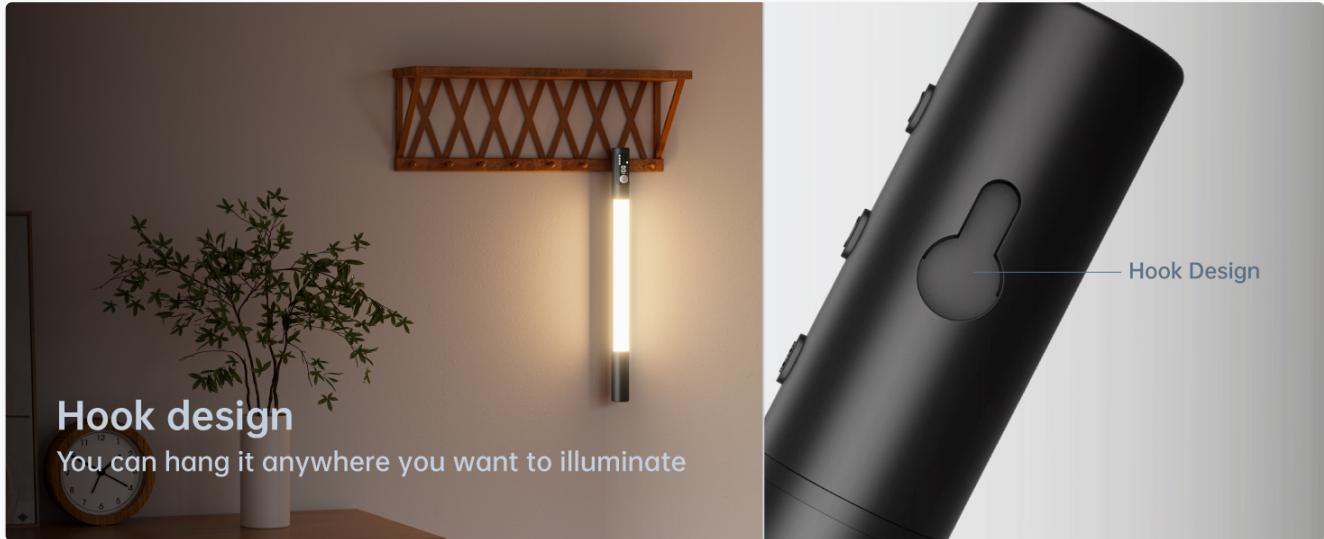

Image: Detailed view of the digital display, illustrating battery level, brightness, and sensing mode icons.

3. Setup and Installation

The Lafaer light offers flexible installation options to suit various indoor locations.

3.1 Magnetic Mounting

The light can be magnetically attached to any iron metal surface directly. For non-metallic surfaces, use the provided metal mounting base.

1. **Prepare the Surface:** Clean the desired installation surface to ensure it is dry and free of dust or grease.
2. **Attach Mounting Base:**
 - **Adhesive Method:** Peel the protective film from the adhesive on the back of the metal mounting base. Press the base firmly onto the cleaned surface for at least 30 seconds. Allow 24 hours for the adhesive to cure before attaching the light.
 - **Screw Method:** For a more permanent installation, use the provided screws to secure the metal mounting base to the surface.
3. **Attach Light:** Align the magnetic side of the light bar with the installed metal mounting base. The light will snap into place magnetically.

Image: Illustration of the magnetic installation process, showing the light bar attaching to two separate magnetic bases.

3.2 Hook Design

The light also features a built-in hook for hanging in various locations.

Image: A detailed view of the hook design on the light, allowing for versatile hanging options.

3.3 Adjusting Sensing Direction

The control module, which contains the motion sensor, can be rotated up to 120 degrees to customize the sensing direction.

Image: The light's digital display and motion sensor, highlighting the flexible sensing direction feature.

Illuminate Your Space Effortlessly and Precisely

With 10FT / 120° Motion Detection Range

Image: A visual representation of the light's motion detection capabilities, showing a 10-foot range and 120-degree angle.

4. Operating Instructions

The light is controlled via touch buttons located near the digital display.

4.1 Power On/Off

Press and hold the power button (usually the main button) for a few seconds to turn the light on or off.

4.2 Changing Sensing Modes

Cycle through the available sensing modes by pressing the mode button (refer to the product diagram for button identification).

- **Constant On Mode:** The light remains continuously on.
- **Night Sensing Mode:** The light activates only when motion is detected in a dark environment.
- **All-Day Sensing Mode:** The light activates whenever motion is detected, regardless of ambient light conditions.

In sensing modes, the light automatically turns off if no motion is detected within the sensing area for approximately

25 seconds.

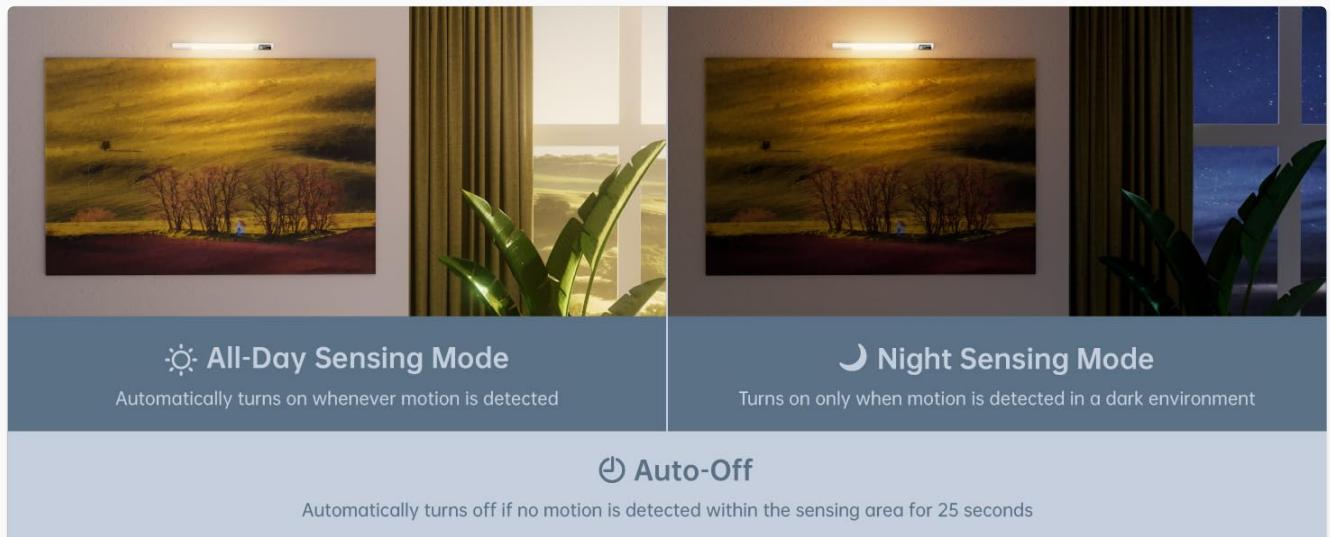

Image: Visual explanation of the All-Day Sensing Mode and Night Sensing Mode, including the automatic 25-second auto-off feature.

4.3 Adjusting Brightness Levels

Press the brightness button to cycle through four brightness levels: 25%, 50%, 75%, and 100%.

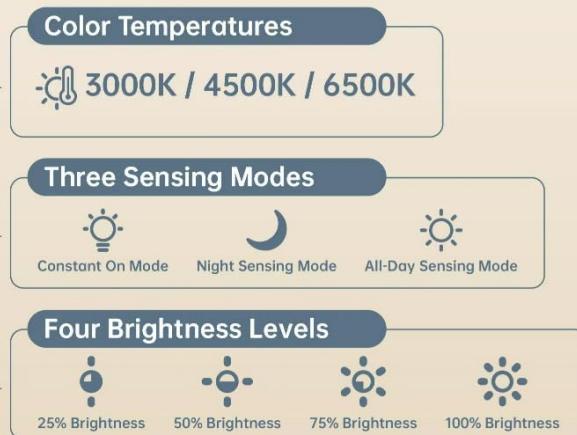

4.4 Changing Color Temperature

Press the color temperature button to cycle through three color temperature options:

- **Warm White (3000K):** A soft, yellowish light.
- **Neutral White (4500K):** A balanced, natural white light.
- **Cool White (6500K):** A bright, bluish-white light.

Adjust The Light As You Wish

Customize the illumination style to match your preference

5. Charging

The Lafaer light is equipped with a rechargeable internal battery. The digital display will show the current battery level.

1. When the battery level is low, connect the provided Type-C charging cable to the light's USB-C port.
2. Connect the other end of the cable to a standard USB power adapter (not included).
3. The digital display will indicate charging status. A full charge can provide up to 6 months of use in motion-sensing mode (with an average of 6 triggers per day) or up to 32 hours of continuous lighting at 25% brightness.

Rechargeable Built-In Battery With Long-Lasting Power

Minimize the Hassle of Frequent Charging

Up to 6 Months of Continuous Use on a Single Charger

*Using Night Sensing Mode with an average of 6 triggers per day

Up to 32 Hours of Continuous Light on a Full Charge

*Using 25% brightness continuously

Image: The light connected to a USB-C charging cable, illustrating its long-lasting battery capabilities.

6. Maintenance

- Cleaning:** Wipe the light with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- Water Resistance:** This product is **not water resistant**. Avoid exposure to water or high humidity.
- Battery Care:** For optimal battery life, avoid fully discharging the battery frequently. Charge the light regularly.

7. Troubleshooting

Problem	Possible Cause	Solution
Light does not turn on.	Battery is depleted.	Charge the light using the provided Type-C cable.

Problem	Possible Cause	Solution
Motion sensor not working.	Incorrect sensing mode selected.	Ensure 'Night Sensing Mode' or 'All-Day Sensing Mode' is active.
Motion sensor range is poor.	Sensor direction is not optimized. Obstructions blocking sensor.	Rotate the control module to adjust the sensor direction. Remove any obstructions.
Light turns off too quickly.	No continuous motion detected within the 25-second auto-off period.	This is normal operation for sensing modes. For continuous light, select 'Constant On Mode'.
Light flickers or dims unexpectedly.	Low battery.	Recharge the light.

8. Specifications

Brand	LAFAER
Model Name	EC-SL380
Material	Aluminum, Plastic
Product Dimensions	1.14" L x 1.06" W x 15" H
Item Weight	7.4 ounces
Power Source	Battery Powered (1 Lithium Ion battery included)
Voltage	3.7 Volts
Wattage	1.35 watts
Light Source Type	LED
Color Temperatures	3000K (Warm White), 4500K (Neutral White), 6500K (Cool White)
Brightness Levels	25%, 50%, 75%, 100%
Control Method	Touch
Switch Type	Motion Sensor
Motion Detection Range	Up to 10 feet / 120 degrees
Water Resistance Level	Not Water Resistant
Mounting Type	Wall Mount (Magnetic, Adhesive, Screws)
Manufacturer	Eternal Cyber Limited

9. Versatile Applications

The LAFAER Motion Sensor Under Cabinet Light is designed for various indoor uses, providing illumination where needed.

Illuminating Any Indoor Dark Corners

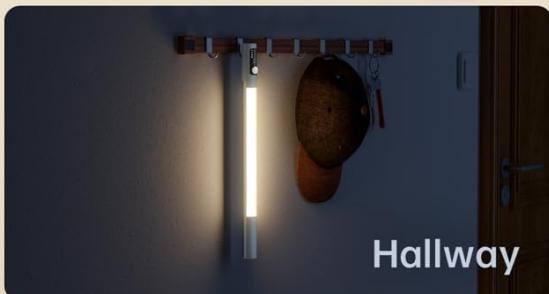

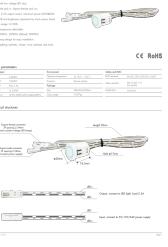

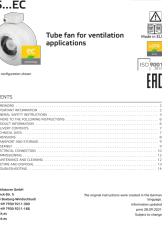

Image: Examples of the light's application in different indoor environments such as closets, garages, hallways, kitchens, bedrooms, and even tents.

10. Warranty and Support

For warranty information and customer support, please refer to the documentation included with your purchase or visit the official LAFAER website. Keep your purchase receipt for warranty claims.
