## TROUBLESHOOTING

Problem	Possible Cause	Solution
Furniture feels wobbly or unstable.	Loose bolts or uneven surface.	Ensure all assembly bolts are fully tightened. Move furniture to a level surface. Check for adjustable feet and adjust if present.
Cushions slide off the frame.	Anti-slip clips not properly engaged or missing.	Verify that the anti-slip clips underneath the cushions are correctly attached to the frame. If clips are missing, contact customer support.
Wicker appears faded or damaged.	Prolonged exposure to direct sunlight or harsh weather.	While designed for outdoor use, extreme conditions can cause wear. Consider using a furniture cover when not in use for extended periods.
