

Eaula Videns J4

Eaula Videns J4 2K Wireless Video Doorbell Camera with Chime

INSTRUCTION MANUAL

INTRODUCTION

The Eaula Videns J4 2K Wireless Video Doorbell Camera with Chime provides advanced home surveillance with high-resolution video and smart features. Designed for both indoor and outdoor use, this battery-powered doorbell offers enhanced security and convenience for your property.

Key Features:

- **2K Resolution:** Capture clear and detailed video footage.
- **Wireless Connectivity:** Easy installation with 2.4G WiFi (5G not supported).
- **AI Human Detection:** Advanced artificial intelligence identifies human figures, reducing false alarms from animals or vehicles.
- **Two-Way Audio:** Communicate with visitors at your door from anywhere using your smartphone.
- **Night Vision:** Equipped with 1080P FHD infrared night vision for round-the-clock security.
- **Local & Cloud Storage:** Store recordings on a 32GB microSD card (included) or utilize optional cloud storage.
- **IP65 Waterproof:** Durable design ensures normal operation in various weather conditions.
- **Indoor Chime:** Includes a wireless indoor chime for real-time alerts.

WHAT'S IN THE BOX

- 1x Video Doorbell
- 1x Indoor Chime
- Mounting Screws and Anchors

- USB Charging Cable
- User Manual
- Reset Pin

INDOOR CHIME REAL-TIME NOTIFICATION

SETUP & INSTALLATION

Follow these steps to set up and install your Eaula Videns J4 Video Doorbell:

1. **Charge the Doorbell:** Before installation, fully charge the doorbell using the provided USB cable.

The charging port is located on the side of the unit.

2. **Download the App:** Download the recommended mobile application (refer to the user manual for the specific app name) from your smartphone's app store.
3. **Pair the Doorbell with the App:** Follow the in-app instructions to pair your doorbell with your smartphone. This typically involves registering an account, selecting to add a new device, and scanning a QR code on the doorbell. Ensure your phone is connected to a 2.4GHz WiFi network during this process.
4. **Mount the Doorbell:** Choose a suitable location near your front door. The doorbell can be mounted using screws and anchors (provided) or with adhesive tape for a non-permanent solution. Ensure the mounting bracket is oriented correctly (e.g., 'UP' arrow pointing upwards).
5. **Attach the Doorbell to the Bracket:** Once the bracket is secured, slide the doorbell unit onto the bracket until it clicks into place. Use the provided reset pin to detach the doorbell from the bracket for charging or maintenance.
6. **Connect the Indoor Chime:** Plug the indoor chime into a power outlet in a central location within your home. Follow the chime's pairing instructions (usually pressing a settings button on the chime and then the doorbell button) to connect it to your doorbell.

Local Storage Free Cloud Storage

The doorbell has a built-in 32 GB Micro SD card that can store up to two months of motion detection video.

The doorbell comes with 1 year of free 2-day recurring cloud storage.

OPERATING INSTRUCTIONS

Once your doorbell is set up, you can access its features through the mobile app:

1. **Live View:** Open the app to view a live feed from your doorbell camera at any time.
2. **Two-Way Audio:** When a visitor presses the doorbell or motion is detected, you can initiate a two-

way conversation through the app. Tap the microphone icon to speak and the speaker icon to listen.

3. **Motion Detection:** The AI Human Detection feature will send notifications to your phone when human motion is detected. You can adjust sensitivity settings within the app.
4. **Night Vision:** The doorbell automatically switches to 1080P FHD infrared night vision in low-light conditions, providing clear footage even in the dark.
5. **Recording & Playback:** Recordings are automatically saved to the installed 32GB microSD card. You can access and play back recorded events through the app's library or history section. Cloud storage options are also available for extended storage.

Video: A short demonstration on how to access and view videos stored on the SD card through the doorbell's mobile application.

Proper maintenance ensures the longevity and optimal performance of your doorbell camera:

- **Battery Charging:** The doorbell is battery-powered. When the battery level is low, remove the doorbell from its mounting bracket and charge it using the USB cable. The frequency of charging depends on usage and motion detection events.
- **Cleaning:** Regularly wipe the camera lens and the doorbell's exterior with a soft, damp cloth to remove dust and dirt. Avoid using harsh chemicals that could damage the device.
- **Weather Protection:** The doorbell has an IP65 waterproof rating, making it resistant to dust and water splashes. However, avoid submerging the device in water or exposing it to extreme weather conditions for prolonged periods.
- **SD Card Management:** Periodically check the storage status of your microSD card through the app. If the card is full, older recordings may be overwritten. Back up important footage or consider upgrading to a larger capacity card (up to 128GB supported).

TROUBLESHOOTING

If you encounter issues with your doorbell camera, refer to the following common solutions:

- **Frequent Battery Draining:** Reduce motion detection sensitivity, decrease live view frequency, or ensure the doorbell is not in an area with constant activity. Ensure the battery is fully charged before use.
- **Connection Issues:** Verify your WiFi network is 2.4GHz. Ensure the doorbell is within range of your WiFi router. Restart your router and the doorbell. Re-pair the device with the app if necessary.
- **No Notifications:** Check app notification settings on your smartphone and within the doorbell app. Ensure the app has necessary permissions.
- **Poor Video Quality:** Ensure the camera lens is clean. Check your WiFi signal strength; a weak signal can affect video streaming quality.
- **Two-Way Audio Echo/Feedback:** This can occur if the phone and doorbell are too close during communication. Move further away from the doorbell when using two-way audio.
- **Doorbell Not Ringing Chime:** Ensure the chime is plugged in and powered on. Re-pair the chime with the doorbell if the connection is lost.

SPECIFICATIONS

Feature	Detail
Model Name	J4
Brand	Eaula Videns
Video Capture Resolution	1080p (FHD Night Vision)
Connectivity Technology	Wireless (2.4GHz WiFi only)
Power Source	Battery Powered (2 Lithium Polymer batteries included)
Special Features	2-Way Audio, HD Resolution, Night Vision, AI Human Detection
Indoor/Outdoor Usage	Indoor, Outdoor
International Protection Rating	IP65
Flash Memory Installed Size	32 GB (Micro SD)
Flash Memory Supported Size Maximum	128 GB
Control Method	App (Android, iPhone compatible)
