7. MAINTENANCE

Proper care will extend the life and appearance of your bed frame.

- **Cleaning Upholstery:** For general cleaning, gently vacuum the upholstered fabric using a soft brush attachment. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner following product instructions. Test on an inconspicuous area first.
- **Frame Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten as necessary to maintain stability and prevent noise.
- **Noise Prevention:** The bed frame is designed with velcro and EVA mute bars. Avoid dragging the bed frame, as this can dislodge these components. If any squeaking occurs, inspect the slat connections and ensure the mute bars are properly seated.
- **Charging Port Care:** Keep the charging ports free of dust and debris. Do not force cables into the ports.

8. TROUBLESHOOTING

If you encounter any issues with your Feonase bed frame, refer to the common problems and solutions below.

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose bolts or displaced mute bars/velcro.	Check and tighten all assembly bolts. Ensure velcro and EVA mute bars on slats are correctly positioned.
Mattress is slipping.	Improperly installed slats or missing mute bars.	Verify all slats are securely in place and the anti-slip features (velcro/mute bars) are intact. The wingback headboard also helps prevent slippage.
Charging station not working.	Power cord not plugged in, faulty cable, or device issue.	Ensure the headboard's power cord is securely plugged into a working wall outlet. Try a different USB cable or device to rule out external issues.
Missing parts during assembly.	Packaging error or lost component.	Carefully re-check all packaging materials. If parts are still missing, contact Feonase Customer Support immediately.
