2. Connecting to Devices

The JOMAA keyboard supports both 2.4G USB and Bluetooth connectivity, allowing connection to mobile phones, tablets, laptops, and desktop computers.

2.1. 2.4G USB Connection

1. Locate the 2.4G USB receiver (dongle) typically stored within the keyboard or packaging.
2. Insert the 2.4G USB receiver into an available USB port on your computer or device.
3. Turn on the keyboard using the power switch. The keyboard should automatically connect to your device.

2.2. Bluetooth Connection

1. Turn on the keyboard using the power switch.
2. Activate Bluetooth on your device (e.g., smartphone, tablet, laptop).
3. On the keyboard, press and hold the Bluetooth pairing key (refer to keyboard layout for specific key, often indicated by a Bluetooth symbol or 'BT1', 'BT2', 'BT3') until the indicator light flashes, signifying pairing mode.

4. On your device, search for available Bluetooth devices and select "JOMAA Keyboard" (or similar name) from the list.

OPERATING INSTRUCTIONS

1. Key Features

- **Silent Keys:** The keyboard utilizes scissor-foot key design, providing a soft tactile feel and significantly reducing typing noise.
- **Ergonomic Design:** The keyboard is designed with a slight incline (higher at the front, lower at the back) to promote a comfortable wrist posture and reduce fatigue during extended typing sessions.
- **Integrated Display:** The electronic display in the upper corner provides real-time information on battery level and connection status.

Mute buttons

The keyboard is designed with silent keys, ensuring a quiet typing experience. A matching transparent mouse is also shown.

2. Multi-Device Switching

If you have paired the keyboard with multiple Bluetooth devices, you can switch between them by pressing the corresponding Bluetooth channel key (e.g., BT1, BT2, BT3). The keyboard will automatically connect to the selected device.

3. Mac Compatibility Notes

For macOS users, please be aware that the default mapping for the **Option** and **Command** keys may be swapped compared to standard Apple keyboards. You can remap these keys within your macOS System Settings (Keyboard > Modifier Keys). Additionally, the **Fn** key functionality is hardware-controlled, and the **Control** key is positioned outside the **Fn** key, which may require adjustment for muscle memory.

MAINTENANCE

To ensure the longevity and optimal performance of your JOMAA keyboard, follow these simple maintenance guidelines:

- **Cleaning:** Gently wipe the keyboard surface with a soft, dry, lint-free cloth. For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid excessive moisture.
- **Storage:** When not in use for extended periods, store the keyboard in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Liquids:** Do not expose the keyboard to liquids. In case of accidental spills, immediately power off the keyboard and allow it to dry completely before attempting to use it again.

TROUBLESHOOTING

If you encounter issues with your JOMAA keyboard, please refer to the following common solutions:

- **Keyboard Not Connecting:**
 - Ensure the keyboard is powered on and fully charged.
 - For 2.4G connection, verify the USB receiver is securely plugged into your device.
 - For Bluetooth connection, ensure Bluetooth is enabled on your device and the keyboard is in pairing mode. Try unpairing and re-pairing the keyboard.
 - Check if the keyboard is connected to another device. Switch to the correct Bluetooth channel if using multi-device pairing.
- **Keys Not Responding:**

- Recharge the keyboard. A low battery can cause intermittent key response.
- Reconnect the keyboard (either 2.4G or Bluetooth).
- **Incorrect Key Output (macOS):**
 - If Option/Command keys are swapped, adjust their mapping in macOS System Settings > Keyboard > Modifier Keys.
 - Familiarize yourself with the Fn key and Control key placement, as their behavior is hardware-defined.
- **Display Not Working:**
 - Ensure the keyboard is powered on.
 - Charge the keyboard to ensure sufficient power.
