5. OPERATING INSTRUCTIONS

Your STARBEDIA electric blanket features a user-friendly wireless controller for easy operation.

5.1 Wireless Controller Functions

Portable Smart Wireless Controller

85°F  116°F

Figure 3: Wireless Controller and its features.

- **Power Button:** Press to turn the blanket ON or OFF.
- **Heat Settings:** Use the '+' and '-' buttons to cycle through 10 heat levels (from 85°F to 116°F). The current heat level will be displayed on the controller screen.
- **Timer Settings:** Press the timer button to select from 5 timer options (2, 4, 6, 8, or 10 hours). The blanket will automatically shut off after the selected time.
- **Dual Control (L/R Heating Zones):** For Queen size blankets, the blanket is divided into two independent heating zones (Left and Right). Use the L/R button on the controller to select which zone you wish to adjust the heat for. This allows personalized warmth for two users.

5.2 Fast Heating Feature

The advanced PTC/NTC heating wire technology allows the blanket to reach your desired warmth quickly, typically within 15 minutes. The maximum temperature can reach up to 116°F.

6. MAINTENANCE AND CARE

Proper care will extend the life of your electric blanket.

6.1 Cleaning Instructions

1. **Detach Controller:** Always ensure the power cord and wireless controller are completely detached from the blanket before washing.
2. **Machine Wash:** Machine wash the blanket in cold water on a gentle cycle. Do not bleach.
3. **Drying:** Tumble dry on low heat or line dry in the shade. Ensure the blanket is completely dry before reconnecting the controller and using it. Do not iron.

6.2 Storage

When not in use, store the blanket in a cool, dry place. Avoid folding it tightly or placing heavy objects on top, which could damage the internal wiring.

7. TROUBLESHOOTING

If you encounter any issues with your electric blanket, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Blanket not heating	Not plugged in; controller not connected; power outage; blanket folded/bunched.	Ensure power cord is securely plugged into outlet and blanket. Check controller connection. Unfold blanket completely.

Problem	Possible Cause	Solution
Controller display is off	Blanket is off; power issue.	Press the power button on the controller. Check power outlet.
Blanket heats unevenly	Blanket is folded or bunched.	Spread the blanket flat and ensure no folds or wrinkles.
Blanket automatically shuts off	Timer expired; overheat protection activated.	This is normal operation if the timer is set or if the blanket detects overheating. Allow to cool before restarting if due to overheat protection.

If the problem persists after attempting these solutions, please contact customer support.
