- **Cleaning:** Wipe the bed frame with a dry cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, which can damage the wood finish.
- **Hardware Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they are tight. Retighten if necessary to maintain structural integrity.
- **Avoid Moisture:** Protect the bed from excessive moisture and direct sunlight, which can cause warping or fading of the wood.

6. Troubleshooting

If you encounter any issues with your LostCat Floor Bed, refer to the following common troubleshooting tips:

- **Squeaking Noises:** If the bed squeaks, check all hardware connections. Loosen slightly, adjust the position of the components, and then retighten firmly. Ensure the bed is on a level surface.
- **Loose Parts:** If any parts feel loose, immediately stop using the bed and retighten all connections according to the assembly instructions.
- **Instability:** Ensure the bed is placed on a flat, even floor. If the floor is uneven, consider using furniture levelers under the bed posts. Verify all assembly steps were completed correctly.
- **Missing Parts:** If you discover any missing parts during assembly, do not proceed. Contact customer support for assistance.
