Maintenance

To maintain the appearance and longevity of your desk, regularly wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners. Ensure all fasteners remain tight to maintain structural integrity. Protect surfaces from excessive moisture and direct heat.

Troubleshooting

- **Assembly Difficulties:** If you encounter issues with misaligned parts during assembly, double-check the instruction manual and ensure all components are oriented correctly. Sometimes, slight adjustments are needed before fully tightening screws.
- **Drawers Not Sliding Smoothly:** Ensure the drawer slides are properly installed and free from obstructions. If the drawers feel stiff, a small amount of silicone lubricant can be applied to the slides.
- **File Bar Movement:** If the adjustable file bar in the bottom drawer moves excessively, ensure it is securely seated in its designated slots. If necessary, a small shim or stopper can be used to prevent unwanted movement.
- **Desk Instability:** Verify that the adjustable foot pads are correctly leveled on all legs to prevent wobbling. Adjust each foot pad until the desk is stable on your floor surface.
