- Close the battery compartment cover securely.

Note: The clock will automatically power on once batteries are inserted. A low battery indicator will appear on the screen when batteries need replacement.

4.2. Initial Power On

Upon successful battery installation, the clock display will activate. It may show a default time or begin searching for a signal if it has an auto-set feature (like Auto DST mentioned in OCR). Proceed to the operating instructions to set the correct time and date.

5. OPERATING INSTRUCTIONS

The function buttons are located on the back of the clock for easy access.

5.1. Setting Time and Date

Refer to the labels on the back buttons (e.g., SET, UP, DOWN, MODE) to adjust the time and date. Typically, you will:

1. Press the **SET** or **MODE** button to enter setting mode. The digit to be set will usually flash.
2. Use the **UP** or **DOWN** buttons to adjust the value.
3. Press **SET** or **MODE** again to confirm the setting and move to the next adjustable item (e.g., hour, minute, year, month, day).
4. Repeat until all desired settings are configured.
5. Exit setting mode by pressing the **SET** or **MODE** button until the display returns to normal, or by waiting for it to time out automatically.

5.2. Day and Temperature Display Modes

The clock offers three display modes for day and temperature. To switch between modes, press the designated button on the back (often labeled 'DAY/TEMP' or 'MODE' if it cycles through options):

- **Day Only:** Displays only the day of the week.
- **Temperature Only:** Displays only the ambient temperature.
- **Day and Temperature Alternating:** Displays the day for 10 seconds, then switches to temperature for 10 seconds, and so on.

Note: Changing the day/temperature display mode does not affect the time or date settings.

5.3. Automatic Daylight Saving Time (Auto DST)

If your clock features an 'AUTO DST' indicator, it means the clock is designed to automatically adjust for Daylight Saving Time changes. Ensure this feature is enabled if you wish for automatic adjustments. Consult the specific button for DST on the back of your clock if manual override is needed.

6. WALL MOUNTING

The WallarGe Digital Wall Clock is designed for easy wall mounting.

1. Choose a suitable location on a wall, ensuring it is level and within easy viewing.
2. Mark the desired positions for the mounting screws using the clock's keyhole slots as a guide.
3. Drill pilot holes if necessary and insert the provided wall anchors.
4. Insert the mounting screws into the anchors, leaving a small portion of the screw head exposed.
5. Carefully align the clock's keyhole slots with the screw heads and slide the clock down to secure it in place.

7.1. Cleaning

To clean your clock, gently wipe the display and casing with a soft, dry, or slightly damp cloth. Do not use abrasive cleaners, solvents, or chemical sprays, as these may damage the clock's surface or internal components.
