7. MAINTENANCE

Regular maintenance will help prolong the life and appearance of your loft bed.

- **Cleaning:** Wipe metal surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that may damage the finish. For the desk surface, use a mild cleaner.
- **Fastener Checks:** Periodically (e.g., every 3-6 months) check all bolts, screws, and connections to ensure they remain tight. Retighten as necessary to maintain stability.
- **LED Strip:** If the LED strip adhesive weakens, use a stronger, non-damaging adhesive to re-secure it.
- **General Inspection:** Inspect the bed frame for any signs of wear, damage, or structural fatigue. Address any issues promptly.

8. TROUBLESHOOTING

If you encounter issues with your HAUSHECK Full Size Loft Bed, refer to the following common solutions:

- **Bed feels unstable or wobbly:** Ensure all assembly steps were followed correctly and all fasteners are securely tightened. Double-check the orientation of all metal frame pieces.
- **LED lights not working:** Check the power connection to the LED strip and the wall outlet. Ensure the remote control batteries are functional and correctly inserted.
- **USB charging station not working:** Verify the bed's main power cable is plugged in. Test with a different USB cable and device to rule out cable or device issues.

- **Difficulty during assembly:** If instructions are unclear, refer to the diagrams carefully. It is highly recommended to have at least two people for assembly. Do not force parts together; if they don't fit, re-check the orientation and part numbers.
