3.2 Powering On/Off

To power on the device, slide the power switch to the ON position. To power off, slide it to the OFF position.

4. OPERATING INSTRUCTIONS

4.1 Basic Recording

The device features one-key operation for recording:

1. Ensure the device is powered on.
2. Press the **Record** button (usually marked with a red circle) to start recording. The screen will indicate recording is in progress.
3. Press the **Record** button again to stop recording. The recording will be automatically saved.

Figure 3: One-Click Recording Operation

A hand is shown pressing the red record button on the digital voice recorder, highlighting its simple one-click recording functionality. For optimal sound quality, record within a distance of two meters (approximately 6.56 feet) from the sound source. The variable sensitivity microphone captures clear audio.

Figure 4: Optimal Recording Distance

This image illustrates the digital voice recorder's capability to record ultra-clear sound within a 2-meter range, with sound waves emanating from a microphone.

4.2 Playback

You can listen to recorded files using the built-in speaker or by connecting wired headphones to the 3.5mm jack. The device also supports MP3 playback for music files.

1. Navigate through your saved recordings using the Menu and navigation buttons.
2. Select the desired file and press the **Play/Pause** button.
3. Adjust volume using the appropriate buttons (refer to quick start guide for specific button layout).

4.3 Bluetooth Connectivity

The voice recorder features Bluetooth 5 for connecting to wireless headphones or Bluetooth speakers for a clearer and more convenient listening experience. **Note: This device cannot be connected to a Bluetooth microphone or a smartphone via Bluetooth for recording purposes.**

1. From the main menu, navigate to the Bluetooth settings.
2. Turn Bluetooth **On**.
3. Select "Search for device" or "Device List" to find available Bluetooth devices.
4. Select your desired headphones or speaker from the list to pair.
