iHome iPP45

iHome PowerPlant iPP45 USB Charging Station

Instruction Manual

PRODUCT OVERVIEW

The iHome PowerPlant is a versatile charging station designed to power multiple devices while seamlessly blending into your home or office decor. It features a modern faux succulent design and provides both USB-C and USB-A charging ports.

SETUP

1. **Unpack the Device:** Carefully remove the iHome PowerPlant, USB cable, and power adapter from the packaging.
2. **Connect Power Adapter:** Plug the included power adapter into a standard Type A - 2 pin (North American) wall outlet (120 Volts AC).
3. **Connect to PowerPlant:** Insert the other end of the power adapter cable into the power input port located on the iHome PowerPlant.
4. **Placement:** Place the iHome PowerPlant on a stable, flat surface. The rubber non-slip feet will help secure it in place. Ensure the faux succulent is positioned as desired.

OPERATING INSTRUCTIONS

Charging Devices

The iHome PowerPlant is equipped with three charging ports:

- Two USB-C ports (20W max shared output)
- One USB-A port (10W max output)

To charge your devices:

1. Connect your device's charging cable to the appropriate USB-C or USB-A port on the iHome PowerPlant.
2. Connect the other end of the cable to your device (e.g., iPhone, Android phone, tablet, earbuds, smartwatch).
3. The device should begin charging automatically.

Note: The two USB-C ports share a maximum output of 20W. If multiple devices are connected, the power will be distributed. The total maximum output for all ports combined is 30W, as it operates on a 30W wall adapter.

MAINTENANCE

Cleaning the Unit

- Ensure the PowerPlant is unplugged from the wall outlet before cleaning.
- Use a soft, dry cloth to wipe down the exterior of the charging station.
- For the faux succulent, a soft brush or a slightly damp cloth can be used to remove dust. Avoid excessive moisture.
- Do not use abrasive cleaners, solvents, or harsh chemicals, as these may damage the finish.

TROUBLESHOOTING

Device Not Charging

- **Check Power Connection:** Ensure the iHome PowerPlant is securely plugged into a working wall outlet and the power adapter is firmly connected to the unit.
- **Verify Cable Connection:** Make sure the charging cable is properly connected to both the PowerPlant's USB port and your device.
- **Try Different Port/Cable:** Test charging with a different USB port on the PowerPlant or a different charging cable to rule out a faulty port or cable.
- **Device Compatibility:** Confirm your device is compatible with USB charging.
- **Power Distribution:** Remember that the two USB-C ports share 20W max output. If you are charging multiple high-power devices simultaneously, charging speed may be reduced or one device might charge slower.

Unit Appears Damaged

- If the unit or its components appear physically damaged, discontinue use immediately.
- Contact iHome customer support for assistance.

SPECIFICATIONS

Feature	Specification
Brand	iHome
Model Number	iPP45
Connector Type	USB Type A, USB Type C
