Jimmy BX8

Jimmy BX8 Mattress Vacuum Cleaner User Manual

Model: BX8

INTRODUCTION

The Jimmy BX8 Mattress Vacuum Cleaner is a powerful and versatile handheld vacuum designed for deep cleaning fabric surfaces. It features advanced technologies such as UV sanitizing, HEPA filtration, ultrasonic mite removal, and hot wind drying to effectively eliminate allergens, dust mites, and other invisible harmful substances, ensuring a cleaner and healthier living environment.

SAFETY INFORMATION

- Read all instructions before using the appliance.
- Do not use the vacuum cleaner on wet surfaces or to pick up liquids.
- Ensure the brush head, dust cup, and filter are correctly installed before operation.
- Keep the appliance away from water.
- The UV light is designed to activate only when the two pressure sensors on the bottom of the unit are engaged with a flat surface. Avoid direct exposure to UV light.
- The hot wind feature can reach temperatures up to 149°F (65°C). Exercise caution to avoid burns.
- This appliance is professional for beds, couches, and other flat fabric surfaces. It is not suitable for long velvet, long fluff carpets, or hard floors.
- Always unplug the appliance before cleaning or performing maintenance.

PACKAGE CONTENTS

Upon opening the package, please verify that all items are present and in good condition:

- 1 x Jimmy BX8 Vacuum Cleaner
- 1 x Cleaning Brush
- 1 x Replacement Filter
- 1 x User Manual

PRODUCT OVERVIEW

The Jimmy BX8 is engineered for comprehensive fabric cleaning, combining powerful suction with advanced sanitization features.

Figure 1: Main view of the Jimmy BX8 Mattress Vacuum Cleaner, showcasing its sleek design and transparent dust cup.

Key Features:

- **Powerful Suction:** Equipped with a 500W motor and 15Kpa suction for deep cleaning.
- **High-Frequency Tapping:** Dislodges dust mites and allergens from deep within fabrics.
- **UV Sanitizing:** Advanced 265-280 nm UV light technology for 99.9% sterilization and mite removal.
- **Ultrasonic Technology:** Emits ultrasonic waves to effectively kill dust mites, safe for babies and adults.
- **Hot Wind Drying:** 149°F (65°C) hot wind mimics sunlight to dry and fluff fabrics, preventing moisture buildup.
- **LED Screen & Smart Dust Sensor:** Provides real-time display of cleaning status, dust index, and selected modes.
- **Dual Cyclone Filtration:** Multi-stage tornado filtration system captures 99.9% of particles as tiny as 0.3 micrometers, ensuring no leaks and maintaining strong suction.
- **Rubber Strip Metal Brushroll:** Delivers strong tapping power for effective allergen removal.
- **Air Purification:** Negative ion technology enhances air quality during cleaning.

Powerful Suction & High-Frequency Tapping

The powerful vacuuming function can penetrate deep into mattresses, sofas, carpets and other dust.

SETUP

- 1. Unpack the Appliance:** Carefully remove all components from the packaging.
- 2. Inspect for Damage:** Check the vacuum cleaner and all accessories for any signs of damage. Do not use if damaged.
- 3. Assemble the Dust Cup and Filter:** Ensure the dust cup and HEPA filter are securely installed in their designated

positions. The filter should be placed with the "UP" side facing upwards.

4. **Connect Power:** Plug the 5-meter long power cord into a suitable electrical outlet (120V~, 60Hz). The appliance is corded and requires continuous power during operation.

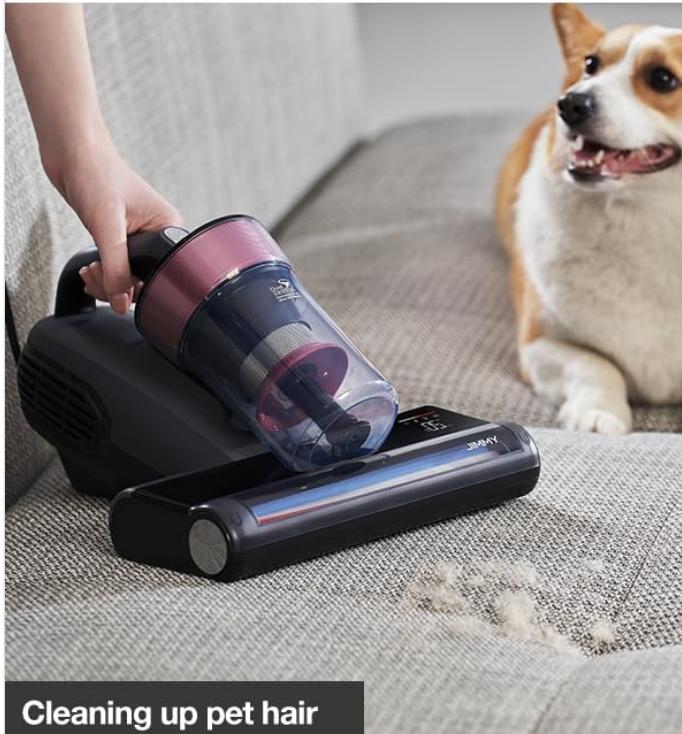

OPERATING INSTRUCTIONS

1. **Power On:** Press the power button located on the handle to turn on the vacuum cleaner. The LED screen will illuminate.
2. **Select Mode:** Use the mode selection buttons on the LED screen to choose between "Strong" and "Soft" suction settings. The screen will also display the "Dust Index" in real-time, indicating the level of dust on the surface.
3. **Activate UV Light:** The UV light will automatically activate when the two pressure sensors on the bottom of the unit are pressed against a flat surface. This ensures safe operation and prevents accidental UV exposure.
4. **Utilize Hot Wind:** The 149°F hot wind function will activate automatically during operation to help dry and fluff fabrics.
5. **Cleaning Surfaces:**
 - For mattresses, pillows, and cribs: Move the vacuum cleaner slowly and evenly across the surface. The high-frequency tapping and powerful suction will work to dislodge and remove dust mites and allergens.
 - For couches, sofas, and stuffed toys: Apply the same slow, even motion. The smart dust sensor will help you identify areas that require more attention.
 - For carpets (short pile only): Use the vacuum cleaner to pick up surface dust and pet hair. Note that it is not suitable for long velvet or long fluff carpets.
6. **Monitor Dust Index:** The LED screen's dust index will change from "Dirty" (higher numbers) to "Clean" (lower numbers, ideally "00") as the surface becomes cleaner.
7. **Power Off:** Press the power button again to turn off the vacuum cleaner when finished.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your Jimmy BX8 vacuum cleaner.

1. Emptying the Dust Cup:

- Press the release button to detach the dust cup from the main unit.

- Open the dust cup and empty its contents into a trash bin.
- The dust cup is detachable and washable. Rinse it with water and ensure it is completely dry before reattaching.

2. Cleaning the Filter:

- Remove the HEPA filter from the dust cup.
- Tap the filter gently to dislodge any trapped dust. For a more thorough clean, rinse the filter under running water.
- Allow the filter to air dry completely (at least 24 hours) before reinserting it. Do not use the vacuum with a wet filter.
- It is recommended to clean the filter after each use to maintain strong suction.

3. Cleaning the Brushroll:

- The brushroll can be easily taken apart for cleaning. Remove any tangled hair or debris using the provided cleaning brush.
- Ensure the brushroll is free of obstructions for effective tapping and suction.

4. UV Lamp Maintenance:

- Periodically wipe the UV lamp surface with a soft, dry cloth to ensure optimal sanitization performance.

TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|-------------------------|-------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| No power | Power cord not properly plugged in. | Ensure the power cord is securely plugged into a working outlet. |
| Weak suction | Dust cup is full. Filter is clogged. Brushroll is obstructed. | Empty the dust cup. Clean or replace the filter. Remove any debris from the brushroll. |
| UV light not activating | Vacuum is not pressed firmly against the surface. UV lamp is faulty. | Ensure both pressure sensors on the bottom are engaged. Contact customer support for assistance. |
| Unusual noise | Obstruction in the brushroll or suction nozzle. | Turn off and unplug the vacuum. Check for and remove any obstructions. |

SPECIFICATIONS
