8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Headset does not power on.	Battery is depleted.	Charge the headset fully.
Cannot pair the headset with a device.	Headset not in pairing mode; Bluetooth off on device; Device too far.	Ensure headset is in pairing mode (flashing blue/red). Turn on Bluetooth on your device. Move headset closer to the device (within 15m).
No sound or low volume.	Volume too low; Headset not connected; Audio output not set to headset.	Increase volume on both headset and connected device. Reconnect the headset. Check audio output settings on your device.
Call quality is poor.	Weak Bluetooth signal; Environmental noise.	Move closer to the connected device. Ensure microphone is not obstructed. SVE technology helps, but extreme noise may still affect quality.
Multipoint connection issues.	Incorrect pairing sequence; Device conflict.	Follow the multipoint pairing instructions carefully (Section 6.5). Disconnect and reconnect devices if necessary.
