Dhyala KJ01

Dhyala KJ01 Air Purifier Replacement Filter Manual

Model: KJ01 | Brand: Dhyala

Introduction

This manual provides essential instructions for the proper installation, operation, and maintenance of your Dhyala KJ01 Air Purifier Replacement Filter. This 3-in-1 H13 Grade True HEPA filter is designed to ensure optimal air quality by effectively capturing dust, pollen, lint, pet dander, and smoke particles. For best performance and to protect your air purifier, always use genuine Dhyala replacement filters.

Product Overview

The Dhyala KJ01 replacement filter is a multi-layer filtration system engineered to provide comprehensive air purification. It consists of:

- **Mesh Pre-Filter:** Captures larger airborne particles such as hair, dander, and lint.
- **True HEPA H13 Filter:** Removes 99.97% of airborne particles as small as 0.3 microns, including dust, pollen, pet dander, and allergens.
- **Activated Carbon Filter:** Absorbs smoke, volatile organic compounds (VOCs), and pet odors.

Installation Guide

Follow these steps to correctly install the Dhyala KJ01 replacement filter into your air purifier:

1. **Remove the Filter Cover:** Locate the filter cover on your Dhyala KJ01 air purifier and gently remove it. Refer to your air purifier's manual for specific instructions on accessing the filter compartment.
2. **Remove the Old Filter:** Carefully pull out the used filter from the air purifier. Dispose of the old filter responsibly.
3. **Unpack the New Filter:** Remove the new Dhyala KJ01 replacement filter from its plastic packaging. Ensure the filter is free from any debris before installation.
4. **Install the New Filter:** Adjust the direction of the new filter to correspond with the filter groove on the upper part of the air purifier. Insert the filter into the compartment. **Important:** The side of the filter with the handle is designed to face outward for easy removal.
5. **Replace the Cover:** Once the new filter is securely in place, reattach the filter cover to the air purifier.

Operating Principles and Benefits

The Dhyala KJ01 replacement filter works in conjunction with your air purifier to continuously clean the air in your home or office. Its advanced design targets various airborne pollutants:

- **Household Dust:** Effectively captures common household dust particles, reducing their presence in the air.
- **Seasonal Pollen:** Traps pollen, providing relief for allergy sufferers during peak seasons.
- **Smoke:** Significantly reduces smoke particles from sources like cooking or tobacco.
- **Pet Odor & Dander:** The activated carbon layer specifically targets and neutralizes pet odors, while the HEPA filter captures pet dander.

Maintenance and Replacement

To maintain peak purification efficiency and ensure the longevity of your air purifier, regular filter replacement is essential. The Dhyala KJ01 filter has an extended service life of up to 3000 hours.

- **Replacement Frequency:** It is recommended to replace the filter every 4-6 months. This duration may vary based on local air quality conditions, usage frequency, and the presence of pets or smokers in your environment.
- **Smart Maintenance Reminder:** Your Dhyala KJ01 air purifier may feature a filter replacement indicator. Please consult your air purifier's manual for details on how to reset this indicator after replacing the filter.
- **Authenticity:** Always use official Dhyala KJ01 replacement filters to ensure compatibility and optimal performance. Using non-genuine filters may void your air purifier's warranty and could lead to reduced filtration efficiency or damage to the device.

Troubleshooting

If you encounter issues after replacing your filter, consider the following common solutions:

- **Filter Does Not Fit:**
  - Verify that you have purchased the correct Dhyala KJ01 replacement filter. Check the model number on your air purifier and compare it with the filter's specifications.
  - Ensure the filter is oriented correctly. The side with the handle should face outward.
  - Gently but firmly push the filter into place, ensuring it seats properly within the grooves. Do not force the filter if it feels significantly misaligned.
- **Air Purifier Not Functioning After Replacement:**
  - Ensure the filter cover is securely closed. Many air purifiers have a safety mechanism that prevents operation if the cover is not fully latched.

- Check if the filter replacement indicator needs to be reset. Refer to your air purifier's user manual for instructions on resetting the filter life monitor.
- Confirm the air purifier is properly plugged into a working power outlet.

- **Reduced Airflow or Odor Persists:**
  - Ensure the new filter was removed from all plastic packaging before installation.
  - Check for any obstructions around the air intake or outlet vents of the air purifier.
  - If the filter is new and odors persist, ensure the room is adequately ventilated and consider the source of the odor. The filter will gradually absorb odors over time.

If problems persist, please contact Dhyala customer support for further assistance.

Specifications

Feature	Detail
Brand	Dhyala
Model Info	KJ01
Item Weight	1.28 pounds
Product Dimensions	13 x 3 x 13 inches (L x W x Th)
Compatible Device	Air Purifier (Dhyala KJ01)
Material Type	Fiberglass, Activated Carbon
Included Components	Filter
MERV Rating	17
Number of Items	1
Unit Count	1.0 Count
