### General Care

- Keep the laptop on a flat, stable surface to ensure proper ventilation.
- Avoid exposing the laptop to extreme temperatures, direct sunlight, or high humidity.
- Clean the screen with a soft, lint-free cloth specifically designed for electronics.
- Use compressed air to clear dust from keyboard keys and ports.

### TROUBLESHOOTING

#### Common Issues and Solutions

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Laptop does not power on.	No power, faulty adapter, or battery issue.	Ensure power adapter is securely connected to laptop and wall outlet. Check wall outlet with another device. Try a different power outlet.
Display is blank or flickering.	Incorrect display settings, driver issue, or hardware problem.	Restart the laptop. Update graphics drivers. If using an external monitor, check cable connections.
Poor performance during gaming.	Overheating, outdated drivers, or background applications.	Ensure proper ventilation. Update graphics and chipset drivers. Close unnecessary background applications. Adjust power settings to high performance.
Wi-Fi connection issues.	Driver issue, router problem, or interference.	Restart the laptop and router. Update wireless drivers. Check router settings.

For more complex issues, refer to the official Alienware support website or contact customer service.
