Shootingstar Refill Glue Card for LiBa FT06

Shootingstar 24 Pack Refill Glue Card for LiBa FT06 Flying Insect Trap Instruction Manual

Model: Refill Glue Card for LiBa FT06

1. INTRODUCTION

This manual provides instructions for the proper use and maintenance of Shootingstar 24 Pack Refill Glue Cards. These cards are designed to be used with compatible indoor flying insect traps, specifically the LiBa FT06 model, to effectively capture various flying insects.

2. COMPATIBILITY

The Shootingstar Refill Glue Cards are specifically designed to be compatible with the LiBa FT06 Flying Insect Trap. They may also be compatible with other similar indoor flying insect traps that utilize a comparable glue board design.

COMPATIBLE WITH LIBA FT06 FLYING INSECT TRAP

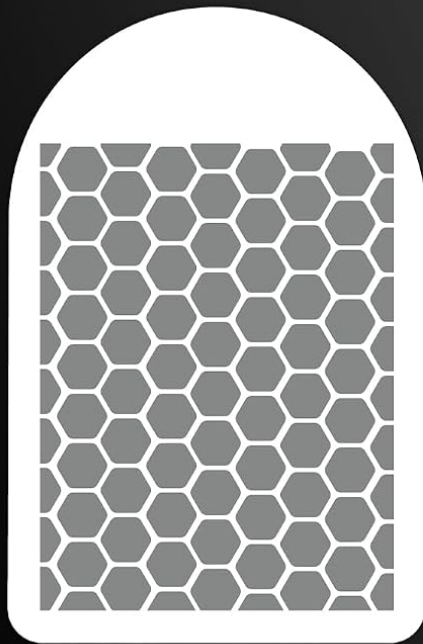

Image: The refill glue card shown next to a LiBa FT06 Flying Insect Trap, illustrating compatibility.

3. FEATURES

- **Effective Insect Trapping:** The glue boards are designed with a super sticky surface to effectively trap mosquitoes, fruit flies, gnats, moths, and other small flying insects.
- **Non-Toxic and Odorless:** These glue cards are non-toxic and produce no smell, making them suitable for indoor use in various living spaces.
- **Long-Lasting:** Each replacement card can remain effective for up to 2 weeks, depending on the insect activity in the area.

4. SETUP AND INSTALLATION

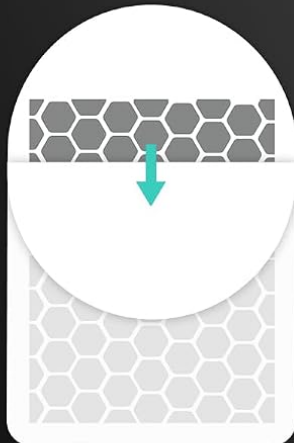

Follow these steps to install a new refill glue card into your compatible insect trap:

1. Carefully remove the new glue card from its packaging.
2. Peel off the protective plastic cover from the adhesive side of the glue card. Ensure the adhesive side is exposed.
3. Insert the exposed glue card into the designated slot of your indoor insect trap (e.g., LiBa FT06). Make sure the adhesive surface faces outwards or towards the light source of the trap, and that it does not adhere to the internal components of the trap itself.

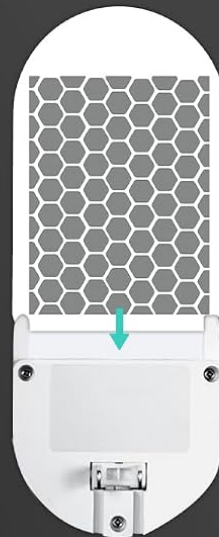

4. Ensure the card is securely seated within the trap.

EASY TO USE

5. OPERATING INSTRUCTIONS

Once the glue card is installed in the insect trap, plug the trap into an electrical outlet in an area where flying insects are observed. The trap's light will attract insects, which will then become stuck to the adhesive surface of the glue card. For optimal results, place the trap in areas prone to insect activity, such as kitchens, living rooms, bedrooms, or near entry points.

6. MAINTENANCE AND REPLACEMENT

The refill glue cards are designed for single use and should be replaced regularly to maintain effectiveness. It is recommended to replace the glue card every 2 weeks, or sooner if it becomes full of insects or loses its stickiness. To replace, simply unplug the trap, carefully remove the old, used card, and dispose of it responsibly. Then, follow the installation steps (Section 4) to insert a new card.

7. TROUBLESHOOTING

- **Insects not being trapped:** Ensure the plastic cover has been fully removed from the glue card. Verify the trap is plugged in and its light is functioning. Consider relocating the trap to an area with higher insect activity.
- **Card not fitting correctly:** Double-check that you are using the correct refill card model for your insect trap. Ensure the card is inserted in the correct orientation.
- **Card losing stickiness prematurely:** High humidity or dusty environments can reduce stickiness. Ensure the trap is placed in a suitable environment and replace the card if necessary.

8. SPECIFICATIONS

Attribute	Value
Product Name	Refill Glue Card
Compatibility	LiBa FT06 Flying Insect Trap and similar models
Quantity	24 Count
Recommended Replacement Interval	Up to 2 weeks
Target Species	Mosquitoes, Fruit Flies, Gnats, Moths, other small flying insects
Material	Adhesive-coated paper
Package Dimensions	3.98 x 2.72 x 0.67 inches
Item Weight	2.39 ounces (0.07 Kilograms)

9. SAFETY INFORMATION

- Keep out of reach of children and pets to prevent accidental contact with the sticky surface.
- Avoid touching the adhesive surface directly. If contact occurs, wash hands with soap and water.
- Do not place near open flames or heat sources.
- Dispose of used glue cards in a sealed bag to prevent insects from escaping and to maintain hygiene.
