Logitech G 920-012868

Logitech G515 TKL Wired Low Profile Gaming Keyboard Instruction Manual

Brand: Logitech G | **Model:** 920-012868

INTRODUCTION AND OVERVIEW

The Logitech G515 TKL Wired Low Profile Gaming Keyboard is engineered for a high-performance, low-profile gaming experience. Its compact, tenkeyless design offers ergonomic comfort and saves desk space. Featuring factory-lubed low-profile GL mechanical switches, double-shot PBT keycaps, and Lightsync RGB, this keyboard provides a smooth, precise, and customizable typing and gaming experience. The wired connection ensures reliable, lag-free performance.

LOW PROFILE. HIGH PERFORMANCE.

This image shows a user engaged in gaming, highlighting the compact and low-profile design of the Logitech G515 TKL keyboard within a typical gaming setup.

SETUP INSTRUCTIONS

1. **Unboxing:** Carefully remove the keyboard and included USB-A to USB-C cable from the packaging.
2. **Connecting the Keyboard:** Insert the USB-C end of the cable into the port on the keyboard. Connect the USB-A end of the cable to an available USB port on your PC or laptop.
3. **Adjusting Keyboard Height:** The keyboard features adjustable feet on the underside. You can raise them to two different heights or keep the keyboard flat for your preferred typing angle.
4. **Software Installation (Optional but Recommended):** For full customization of RGB lighting and key assignments, download and install the Logitech G HUB software from the official Logitech G website.

ULTRA-THIN DESIGN

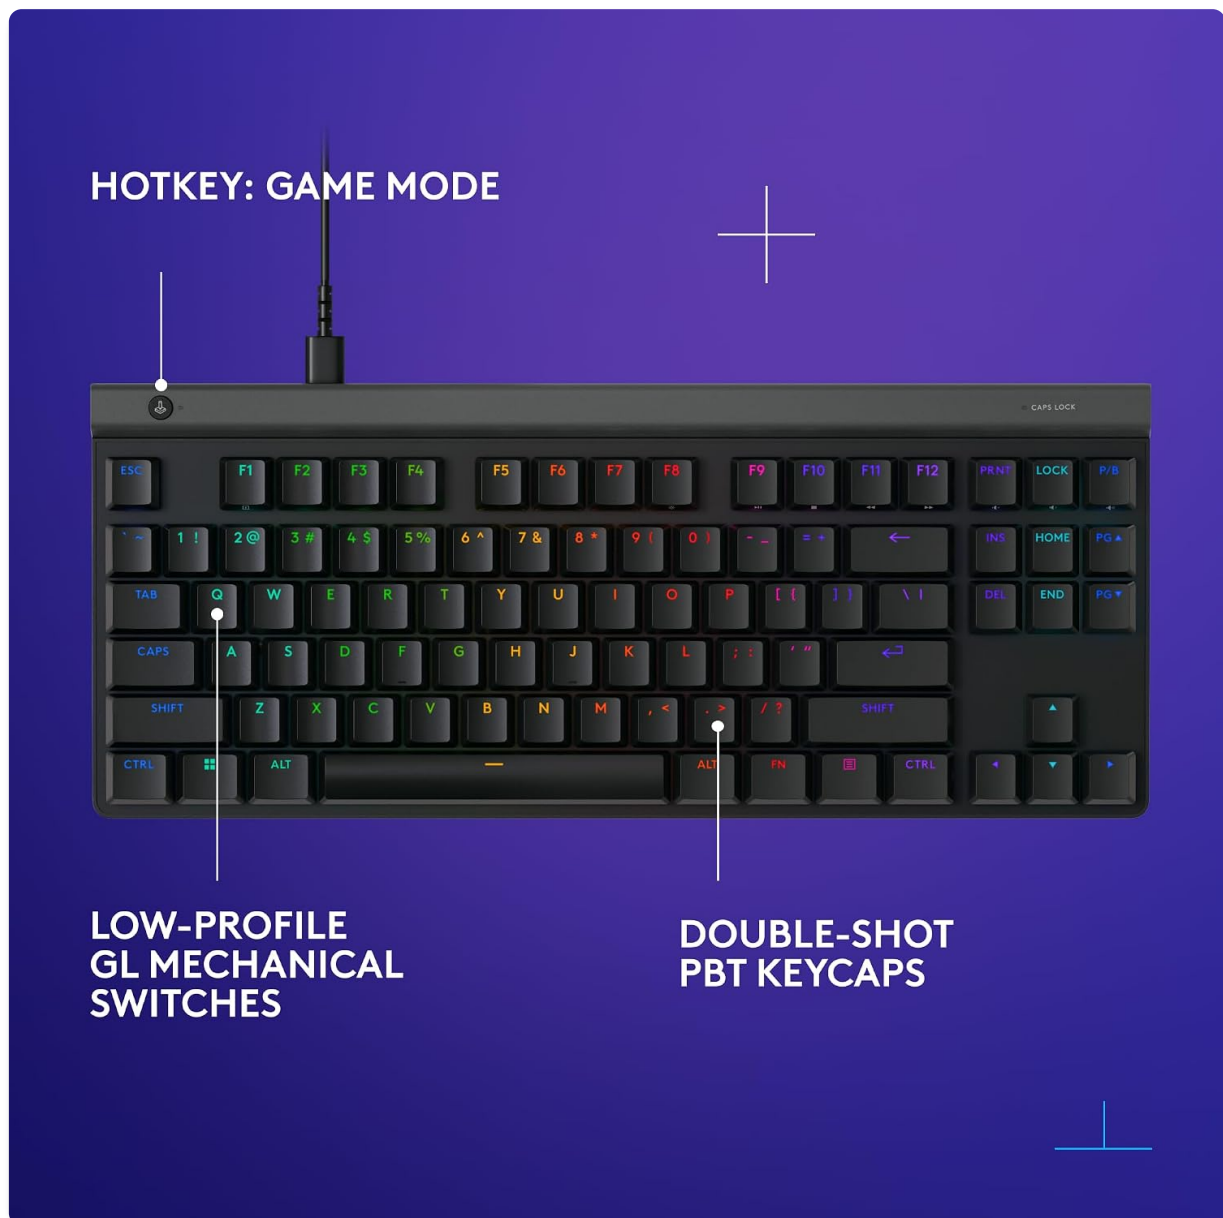

22 MM HEIGHT

A close-up side view of the keyboard, emphasizing its ultra-thin profile and low-profile keycaps, which contribute to ergonomic comfort.

OPERATING YOUR KEYBOARD

Key Features:

- **Low-Profile GL Mechanical Switches:** Experience smooth, precise, and quiet keystrokes. These switches are factory-lubed for enhanced performance.
- **Double-Shot PBT Keycaps:** Designed for durability and a premium feel, these keycaps resist oil and wear, maintaining their appearance over time.
- **Lightsync RGB:** Customize your keyboard's lighting with approximately 16.8 million colors. Use Logitech G HUB to create personalized themes and synchronize lighting with other Logitech G devices.
- **Keycontrol Technology:** Unlock advanced customization by remapping any key to suit your preferences, transforming your keyboard into a personalized control center.
- **Game Mode:** Utilize the dedicated Game Mode hotkey to disable certain keys (e.g., Windows key) during gaming sessions to prevent accidental interruptions.

This image provides a detailed view of the keyboard's keycaps and the underlying low-profile mechanical switches, along with the Game Mode hotkey.

CUSTOMIZE YOUR PLAY

PROGRAM ANY KEY WITH KEYCONTROL

This image illustrates the Logitech G HUB software, demonstrating how users can program and customize individual keys and lighting effects on the G515 TKL keyboard.

MAINTENANCE

- **Cleaning:** Regularly clean your keyboard to prevent dust and debris buildup. Use a soft, lint-free cloth for the surface. For keycaps, a damp cloth with mild soap and water can be used, ensuring no liquid enters the switches.
- **Keycap Care:** The double-shot PBT keycaps are designed to be anti-oil. Avoid harsh chemicals or abrasive materials that could damage the keycap surface.
- **Cable Management:** Ensure the USB cable is not excessively bent or strained to prolong its lifespan.

LIGHT UP THE GAME

LIGHTSYNC RGB WITH G HUB

An overhead shot of a complete gaming setup, showcasing the vibrant Lightsync RGB illumination of the keyboard and other peripherals, emphasizing the aesthetic aspect.

TROUBLESHOOTING

Common Issues and Solutions:

1. Keyboard Not Responding:

- Ensure the USB cable is securely connected to both the keyboard and the computer.
- Try connecting the keyboard to a different USB port on your computer.
- Restart your computer.

2. RGB Lighting Not Working/Customizing:

- Verify that the Logitech G HUB software is installed and up to date.
- Check the keyboard's power switch (if applicable, though this is a wired model, ensure it's not in a 'sleep' or 'off' state if it has a physical switch for lighting).
- Within G HUB, ensure lighting profiles are correctly configured and active.

3. Keys Not Registering:

- Gently clean around the affected key to remove any debris.
- If the issue persists, contact Logitech G support.
