## ASSEMBLY INSTRUCTIONS

Assembly typically takes less than an hour. Follow the numbered steps provided in the included paper manual. A regular screwdriver is recommended for most steps, especially for delicate parts like the bed, to avoid overtightening or splitting wood. While a power screwdriver can be used, exercise caution and slow speed.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out and identify each

piece using the parts list in your manual.

2. **Assemble Main Structure:** Follow the diagrams to connect the main wooden panels and floors. Ensure all connections are secure.
3. **Install Roof and Balcony:** Attach the roof sections and the balcony structure as indicated.
4. **Attach Curtains and Awning:** When installing curtains and the fabric awning, ensure they are facing the desired direction before securing them.
5. **Remove Protective Film:** Do not forget to remove the protective film from any plexiglass or clear plastic pieces. This film can be tightly adhered, so gently peel from a corner.
6. **Assemble Furniture:** Assemble the 37 individual furniture pieces according to their specific instructions. Pay close attention to details for items like the bed and kitchen island.
7. **Placement of Accessories:** Once the main structure and furniture are assembled, place the accessories such as mirrors and wall pictures in their designated spots.
