# Xiaomi Dust Mite Vacuum 2 User Manual

Model: MJCMY02DY

## INTRODUCTION

Thank you for choosing the Xiaomi Dust Mite Vacuum 2. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new appliance. Please read this manual thoroughly before first use and keep it for future reference.

## IMPORTANT SAFETY INSTRUCTIONS

- Always disconnect the appliance from the power supply before cleaning or performing maintenance.
- Do not use the vacuum cleaner on wet surfaces or to pick up liquids.
- Keep hair, loose clothing, fingers, and all parts of the body away from openings and moving parts.
- Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
- Do not use without the dust cup and filter in place.
- This appliance is for household use only.
- Ensure the power cord is not damaged. If damaged, it must be replaced by the manufacturer or a qualified service agent.

## PACKAGE CONTENTS

Please check the package contents upon opening to ensure all items are present and in good condition:

## SETUP

- Unpacking:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
- Power Connection:** Plug the power cord into a suitable electrical outlet. Ensure the voltage matches the specifications of the vacuum cleaner.
- Dust Cup Installation:** Ensure the visual dust cup is securely attached to the main unit before operation.

## OPERATING INSTRUCTIONS

The Xiaomi Dust Mite Vacuum 2 is designed for effective cleaning of dust mites and allergens from various fabric surfaces.

- Power On:** Press the power button located on the handle to turn on the vacuum.

2. **Surface Application:** Place the vacuum head flat against the surface you wish to clean, such as mattresses, sofas, or upholstered furniture.
3. **Cleaning Motion:** Move the vacuum slowly and steadily across the surface. The device utilizes a 3-zone high-frequency tapping mechanism (12,000 times per minute) to dislodge dust mites and allergens from deep within fabrics.
4. **Hot Air Drying:** The integrated 50°C hot air drying function helps reduce moisture and inhibit mite growth. This function operates automatically during cleaning.

5. **UV Sterilization:** The integrated UV irradiation system provides 99% sterilization and 90% mite removal. Ensure the vacuum head is in full contact with the surface for effective UV exposure.
6. **High Suction:** Benefit from 12000Pa high suction power, combined with an upgraded cyclone dust filtration system, to efficiently capture dislodged particles into the visual dust cup.

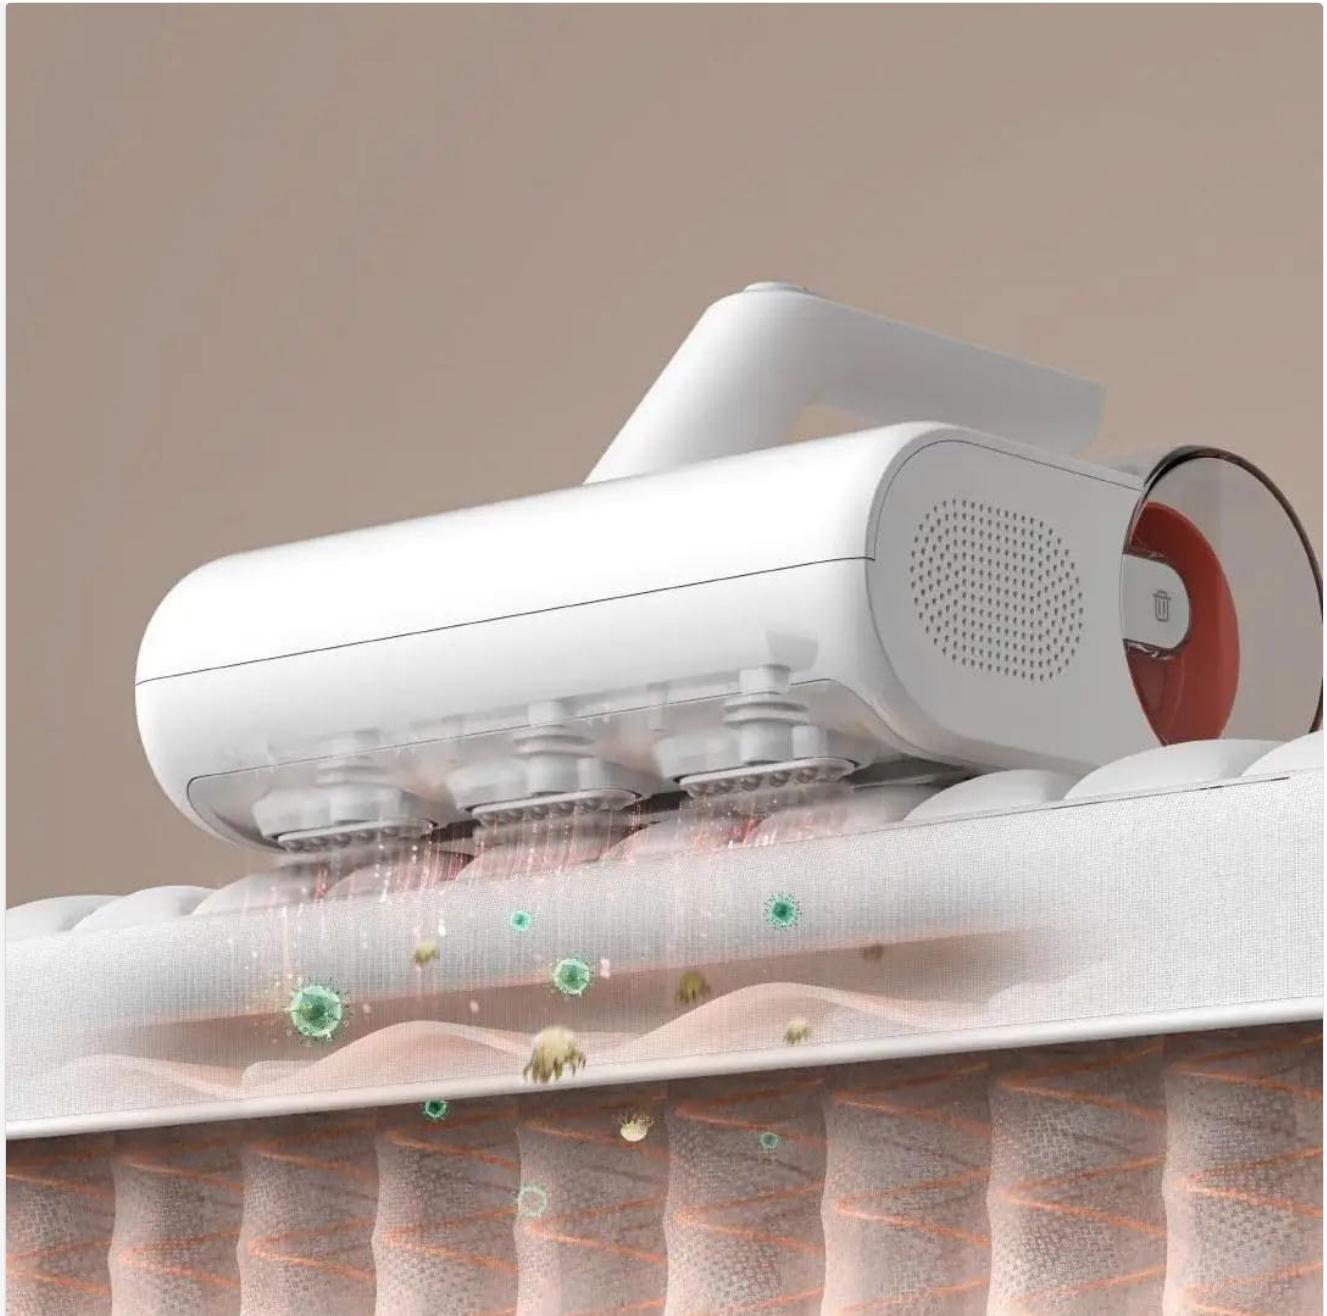

Figure 6: Diagram showing the high-frequency tapping mechanism dislodging particles from fabric.

7. **Monitoring Dust Cup:** The visual dust cup allows you to see the collected dust and debris, indicating when it needs emptying.
8. **Power Off:** Press the power button again to turn off the vacuum after use.

## MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your vacuum.

### 1. Emptying the Dust Cup:

After each use, or when the dust cup appears full, detach it from the main unit. Empty the collected debris into a waste bin. The visual dust cup makes it easy to see when it needs emptying.

### 2. Cleaning the Filter:

The HEPA filter should be cleaned regularly to maintain suction power. Remove the filter from the dust cup. Tap it gently to remove loose dust. If necessary, rinse the filter under running water. Ensure the filter is completely dry before reinserting it into the dust cup and reattaching it to the vacuum.

### 3. Wiping the Exterior:

Wipe the exterior of the vacuum with a soft, damp cloth. Do not use abrasive cleaners or solvents.

#### 4. UV Lamp Maintenance:

Periodically check the UV lamp area for dust accumulation. Gently wipe with a dry, soft cloth if needed. Do not touch the UV lamp directly with bare hands.

## TROUBLESHOOTING

If you encounter issues with your Xiaomi Dust Mite Vacuum 2, refer to the following table for common problems and solutions.

Problem	Possible Cause	Solution
Vacuum does not turn on.	No power supply. Power cord damaged.	Check if the power cord is securely plugged into an active outlet. Inspect the power cord for damage. If damaged, contact customer support.
Low suction power.	Dust cup is full. Filter is clogged. Air inlet/outlet blocked.	Empty the dust cup. Clean or replace the HEPA filter. Check for obstructions in the suction nozzle or air vents.
Unusual noise during operation.	Foreign object in the tapping mechanism or suction path.	Turn off and unplug the vacuum. Inspect the tapping pads and suction opening for any foreign objects and remove them carefully.
UV lamp not illuminating.	Vacuum head not in full contact with surface. UV lamp malfunction.	Ensure the vacuum head is pressed firmly against the cleaning surface. If the issue persists, contact customer support.
