Motorola Moto tag User Manual

Model: PG38C06068

INTRODUCTION

The Motorola Moto tag is a compact item finder designed to help you locate your belongings with precision. Utilizing Google's Find My Device network, it offers global tracking capabilities and integrates seamlessly with Android devices. Each tag is built for durability, featuring IP67 underwater protection and a long-lasting battery.

PACKAGE CONTENTS

- Motorola Moto tag (4 units)
- Pre-installed Batteries (CR2032)
- Quick Start Guide (not included in this manual)

SETUP

1. **Prepare your Android Device:** Ensure your Android phone is running the latest version of Android and has Bluetooth and location services enabled. Download and install the Google Find My Device app from the Google Play Store if you don't already have it.
2. **Activate the Moto tag:** The Moto tag comes with a pre-installed battery. To activate, simply pull the battery tab (if

present) or ensure the tag is ready for pairing.

3. **Pairing with your Phone:**

- Open the Google Find My Device app on your Android phone.
- Follow the on-screen prompts to add a new device. The app will scan for nearby Moto tags.
- When your Moto tag appears, select it to initiate the pairing process.
- Confirm the pairing on both the app and by pressing the button on the Moto tag if prompted.

4. **Name your Moto tag:** Once paired, you will be prompted to name your Moto tag (e.g., "Keys," "Backpack," "Wallet"). This helps in identifying your items within the app.

5. **Attach the Moto tag:** Securely attach the Moto tag to the item you wish to track. The tag is designed to accommodate various third-party accessories for easy attachment.

OPERATING INSTRUCTIONS

Locating an Item Nearby (Bluetooth & UWB)

To find an item that is within Bluetooth range:

1. Open the Google Find My Device app.
2. Select the Moto tag associated with the item you are looking for.
3. Tap the "Play sound" option. The Moto tag will emit an audible sound to help you locate it.
4. For UWB-enabled phones, the app may provide precise, step-by-step guidance to the tag's location.

Locating an Item Remotely (Find My Device Network)

If your item is out of Bluetooth range, the Google Find My Device network can help locate it:

- The Moto tag will anonymously communicate its location to the Find My Device network when it comes within range of any Android device on the network.
- Open the Google Find My Device app or visit google.com/android/find on a web browser.
- The app/website will display the last known location of your Moto tag on a map.

Unwanted Tracking Protection

The Moto tag is designed with privacy in mind. If an unknown Moto tag is detected traveling with you over time, your Android device will notify you, allowing you to locate the tag and disable it if necessary. All tracking data is protected by end-to-end encryption.

MAINTENANCE

Battery Replacement

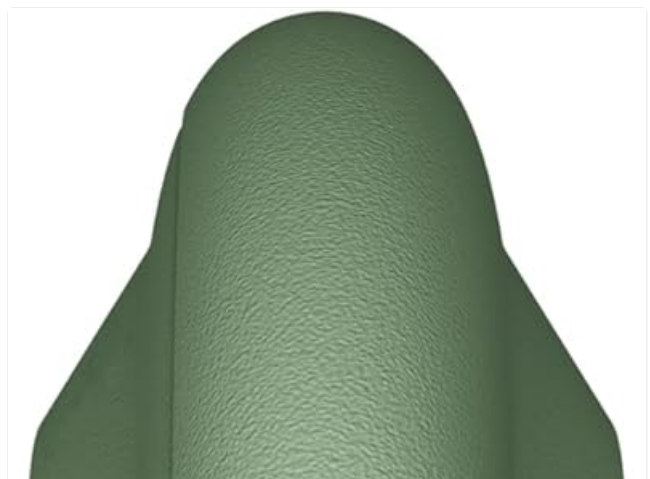

The Moto tag uses a standard CR2032 coin cell battery, which typically lasts up to one year. When the battery is low, the Google Find My Device app will notify you.

1. Locate the battery compartment on the Moto tag. It is usually a small cover that can be twisted or pried open.
2. Using a small tool (like a coin or a flat-head screwdriver), gently open the battery compartment.
3. Remove the old CR2032 battery.
4. Insert a new CR2032 battery with the positive (+) side facing up.
5. Securely close the battery compartment cover.

Note: Dispose of old batteries responsibly according to local regulations.

Cleaning

Wipe the Moto tag with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. The device is IP67 rated for water and dust resistance, meaning it can withstand immersion in up to 1 meter of fresh water for up to 30 minutes.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Moto tag not connecting/pairing.	Battery is low or dead. Bluetooth is off on phone. Tag is out of range. App needs restart.	Replace battery. Enable Bluetooth on your phone. Move closer to the tag. Close and reopen the Google Find My Device app.
No sound from Moto tag.	Battery is low or dead. Tag is out of range. Sound feature not activated in app.	Replace battery. Move closer to the tag. Ensure "Play sound" is selected in the app.
Inaccurate location.	GPS/Location services off on phone. Limited network coverage. Interference.	Enable location services. Move to an area with better network connectivity. Avoid placing tag near large metal objects.

SPECIFICATIONS

Model Number	PG38C06068
