1. SETUP GUIDE

This section provides instructions for the initial setup of your FunFlix A1 4K Projector.

1.1 Unboxing and Package Contents

Carefully unpack all components from the box. Ensure all items are present:

- FunFlix A1 Projector
- Adapter
- AV Cable
- HDMI Cable
- Projector Lens Cap
- Power Cord
- User Manual

1.2 Placement and Initial Power On

Place the projector on a stable, flat surface. Connect the power cord to the projector and a power outlet. Press the power button to turn on the device. The projector features advanced automatic adjustments for ease of use.

[Automatic Focus and Keystone Correction](#)

The FunFlix A1 projector is equipped with automatic focus and auto-correction features. Upon startup or movement, the projector will automatically adjust the image clarity and correct trapezoidal distortion to ensure a perfectly rectangular picture.

Image: The projector automatically adjusts for optimal clarity and shape, including auto keystone, auto screen entry, and auto obstacle avoidance.

Auto Screen Entry and Obstacle Avoidance

The projector can automatically detect the screen boundaries and adjust the image to fit perfectly. It also features automatic obstacle avoidance, resizing the projection to steer clear of objects in its path.

2.4G+5G WIFI Wireless Connection

wireless connection, faster and lower latency

Image: The projector automatically aligns the image to the screen boundaries.

STEREO SURROUND SOUND TO ENJOY AN IMMERSIVE AUDITORY FEAST

Bluetooth Connection & Hi-Fi Speaker

Tips: Bluetooth Can Only Connect External Sound Equipment to Transfer Audio.
Such As Bluetooth Speaker, Sound Bar, Bluetooth Earphones.

Image: The projector automatically adjusts the image to avoid obstacles in its projection path.

Zoom Functionality

The projector supports a 50%-100% zoom range, allowing you to adjust the screen size without physically moving the projector. This enables projection onto a large screen of 50-300 inches.

3. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your FunFlix A1 projector.

3.1 Dust-proof Design

The FunFlix A1 projector features an IP5X dust-proof design with an enclosed optical engine. This design prevents dust from entering the internal components, which significantly extends the projector's lifespan and prevents common issues like yellowing screens or black spots over time.

With this design, the projector is built to last over 10,000 hours of playback.

3.2 General Care

- Keep the projector in a clean, dry environment.
- Avoid blocking the ventilation openings to ensure proper airflow and prevent overheating.
- Clean the lens gently with a soft, lint-free cloth designed for optical surfaces.

4. TROUBLESHOOTING

This section addresses common issues you might encounter with your FunFlix A1 projector.

4.1 Image Issues

- **Blurry Image / Out of Focus:** The projector has auto-focus. If the image appears blurry, try slightly moving the projector or manually adjusting focus via the remote control (if available) to trigger the auto-focus mechanism. Ensure the lens is clean.
- **Distorted Image (Trapezoid Shape):** The projector features auto-keystone correction. If the image is not rectangular, ensure the projector is placed on a stable surface and try slightly adjusting its position to re-trigger the auto-correction.
- **Image Not Filling Screen / Obstacles in View:** The projector has auto screen entry and obstacle avoidance. Ensure there are no physical obstructions directly in front of the lens. The projector should automatically adjust the image size and position.

4.2 App and Streaming Issues

- **Apps Not Working / Slow Performance:** Ensure the projector is connected to a stable internet connection (2.4G or 5G WiFi). Check for system updates in the projector's settings and update any installed applications. If specific apps like Prime Video are not functioning, try reinstalling them or clearing their cache. For persistent issues, consider using an external streaming device (e.g., Chromecast, Fire TV Stick) connected via HDMI.
- **Cannot Download Apps:** Verify your internet connection. Ensure you are signed into your Google account (if

applicable) in the Play Store.

4.3 Connectivity Issues

- WiFi Connection Problems:** Ensure the projector is within range of your WiFi router. Try restarting both the projector and your router. Verify the correct WiFi password is entered.
- Bluetooth Device Not Connecting:** Ensure the Bluetooth device (speaker, headphones) is in pairing mode and within range. Check that no other devices are currently connected to the projector via Bluetooth.
- No Signal via HDMI/USB/AV:** Ensure the cable is securely connected to both the projector and the source device. Select the correct input source on the projector's menu. Try a different cable or source device to rule out faulty equipment.

5. PRODUCT SPECIFICATIONS

Feature	Detail
Brand	FunFlix
Model Number	A1
Brightness	800 ANSI Lumens
