

BORGGOVA BH-01

BORGGOVA 700W Haze Machine BH-01 User Manual

Model: BH-01 | Brand: BORGGOVA

1. INTRODUCTION

Thank you for choosing the BORGGOVA 700W Haze Machine BH-01. This device is designed to produce a fine, atmospheric haze, enhancing lighting effects for various events. It features a powerful 700-watt output, quick heating technology, and multiple control options including a wireless remote, timer function, and DMX compatibility. This manual provides essential information for safe and effective operation.

2. SAFETY INFORMATION

WARNING:

- Always disconnect from power supply before opening for servicing or changing the fuse.
- Use only under adult supervision.
- Do not operate without fluid.
- Always disconnect from power supply and allow to cool before changing the fluid.
- Keep front of machine clear from obstructions when operating.
- No serviceable parts inside.
- Always run distilled water through the system after use to prevent clogging.
- Non-compliance with these precautions may result in damage to your machine, property, or personal injury and cannot be held responsible.

3. PACKAGE CONTENTS

Verify that all items are present and in good condition upon unpacking:

- Machine Body: 1 pc
- Power Cable: 1 pc
- Wireless Remote: 1 pc
- User Guide: 1 pc

PACKAGE INCLUDES

- Machine Body: 1 pc
- Power Cable: 1 pc
- Wireless Remote: 1 pc
- User Guide: 1 pc

Image: All components included in the BORGOWA 700W Haze Machine package, laid out on a surface. This includes the haze machine, power cable, wireless remote, and user guide.

4. PRODUCT OVERVIEW

Familiarize yourself with the main components of the haze machine:

PRODUCT DETAILS

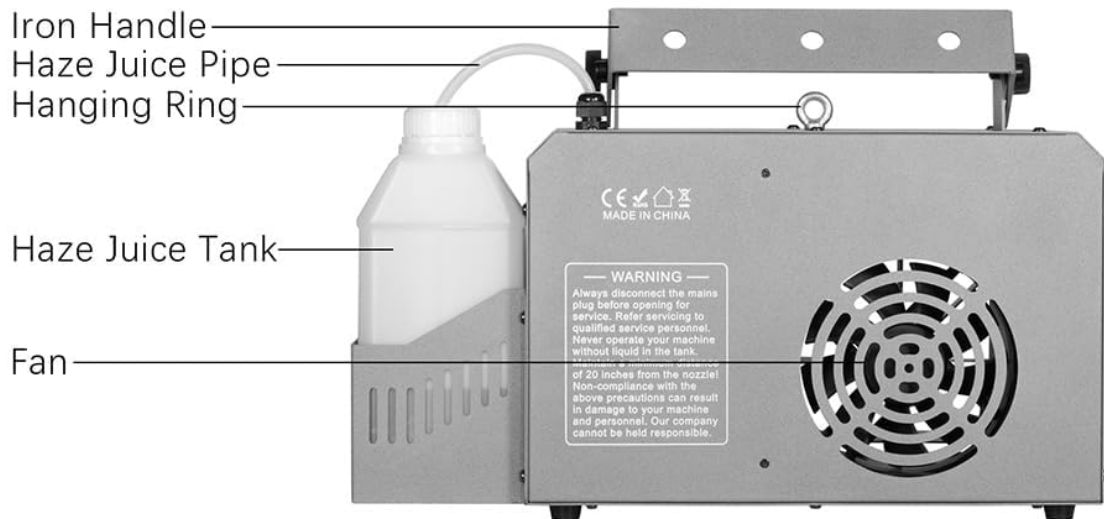

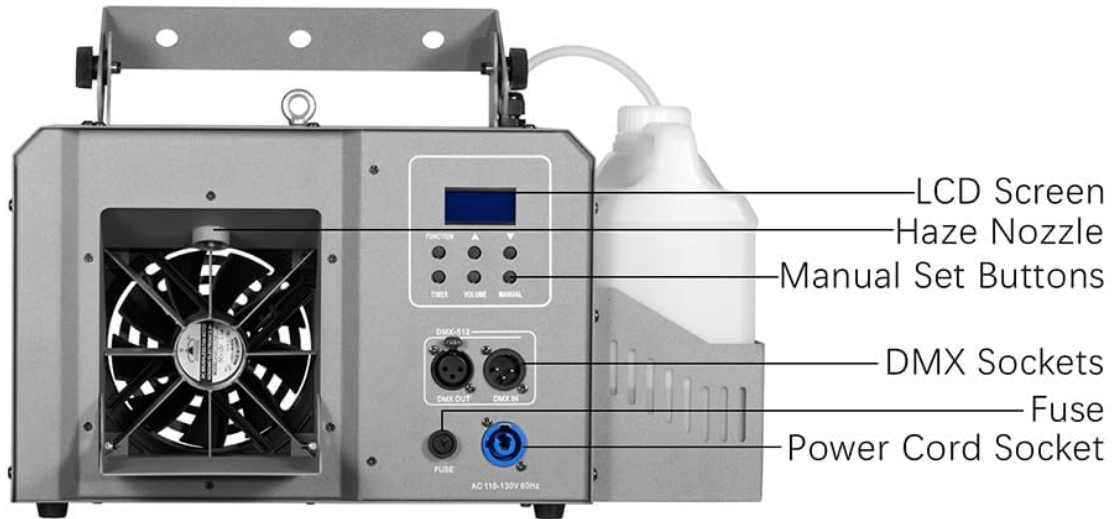

Image: A top-down and rear view of the haze machine, labeling key components such as the LCD screen, haze nozzle, manual set buttons, DMX sockets, fuse, power cord socket, iron handle, haze juice pipe, hanging ring, haze juice tank, and fan.

5. SETUP

- 1. Install the Handle:** Attach the iron handle to the sides of the machine using the provided screws. Ensure it is securely fastened for safe transport and positioning.
- 2. Fill the Haze Fluid Tank:** Unscrew the cap of the haze juice tank. Carefully pour appropriate haze fluid (not included) into the tank. Ensure the metal liquid nozzle is fully submerged in the haze liquid. Securely close the tank lid.
- 3. Connect Power:** Plug one end of the power cord into a 110-volt power outlet and the other end into the machine's power cord socket.

Image: A visual guide showing the steps to set up the haze machine, including pouring haze liquid, connecting the power cord, and setting parameters.

Video: Demonstrates the setup process of a haze machine, including filling the fluid tank, connecting power, and initial power-on. This video is provided by the seller XW STAGE.

6. OPERATING INSTRUCTIONS

6.1. Initial Warm-up

After connecting the power, turn on the machine. It will begin to warm up, which typically takes about 1 minute. The display will indicate when it is ready for operation.

6.2. Control Panel Operation

Use the buttons on the control panel to set parameters such as haze output volume, fan speed, continuous puffing time, and interval puffing time. The LCD screen will display the current settings.

6.3. Wireless Remote Control

Once the machine has warmed up, you can activate haze output using the wireless remote control. The remote allows for convenient operation from a distance.

Video: Shows the BORGONA Haze Machine in operation, demonstrating personalized settings, timer function, manual smoke button, wireless remote control, and DMX 512 control. This video is provided by the seller Xuanwustage.

6.4. DMX Control

For advanced control, connect the haze machine to a DMX console. This allows for integration into larger

lighting setups and precise control over haze output.

6.5. Timer Function

The built-in timer function allows you to set specific intervals and durations for haze emission, providing automated operation for prolonged events.

7. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your haze machine:

- **Cleaning:** After each use, especially if storing for an extended period, run distilled water through the machine to clean the internal pump and heating element. This prevents residue buildup and clogging.
- **Storage:** Store the machine in a cool, dry place. Ensure the fluid tank is either empty or filled with distilled water if storing for a long time.
- **Inspection:** Periodically check the power cord, DMX cables, and fluid lines for any signs of wear or damage.

8. TROUBLESHOOTING

If you encounter issues with your haze machine, refer to the following common solutions:

- **No Haze Output:**
 - Check if the power is connected and the machine is turned on.
 - Ensure the fluid tank has sufficient haze liquid.
 - Verify that the machine has completed its warm-up cycle (indicated by the display).
 - Check if the remote control or DMX settings are correctly configured.
- **Weak Haze Output:**
 - Ensure the haze fluid is of good quality and suitable for the machine.
 - Check the output volume settings on the control panel or DMX console.
 - Perform a cleaning cycle with distilled water to clear any partial clogs.
- **Machine Not Heating:**
 - Verify power connection and ensure the power switch is on.
 - Check the fuse. If blown, replace it with a fuse of the same rating.

If problems persist after attempting these solutions, please contact BORGOVA customer support.

9. SPECIFICATIONS

Feature	Detail
Item Weight	11.82 pounds
Package Dimensions	18.6 x 12.5 x 10.7 inches
ASIN	B0DB646ZK3
Item Model Number	BH-01
Date First Available	July 25, 2024
Power	700 Watts
Warm-up Time	1 minute
Spray Volume	6000 cubic ft/minute
Tank Capacity	2.1 liters / 0.55 gallons

10. WARRANTY AND CUSTOMER SUPPORT

For warranty information, technical support, or any inquiries regarding your BORGOVA 700W Haze Machine BH-01, please refer to the contact details provided on the product packaging or visit the official BORGOVA website. Keep your purchase receipt for warranty claims.
